

STOXX® USA 900 EQUAL WEIGHT INDEX

Index description

The STOXX® USA 900 Equal Weight Index measures the performance of the same stocks as the standard free-float market cap weighted indices but uses a different weighting scheme by attributing to each component the same weight. The index has a fixed number of components and is part of the STOXX blue-chip index family.

Key facts

»The reduced importance of single components makes the index performance less dependent on the performance of individual members.

»Smaller companies are more strongly represented in the STOXX® USA 900 Equal Weight Index than in the parent index.

Methodology

The index components exactly match the parent index members, e.g. the STOXX® USA 900 Equal Weight Index consists of the same stocks as the STOXX® USA 900 Index. The same weight is attributed to all components each quarter, regardless of their free-float market capitalization.

Extraordinary replacements are added at the same weight as the deleted stock. The detailed methodology including the calculation formula can be found in our rulebook:

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

³ Net dividend yield is calculated as net return index return minus price index return
