Methodology

Index universe is the STOXX Balkan Total Market Index (TMI).

Target coverage: highest-ranked components in the STOXX Balkan TMI by free-float market cap. To ensure a significant and balanced representation of all eligible countries, the index comprises the 10 largest companies in Greece and Turkey and the five largest companies in the other countries.

The weight of each component is 2%. The detailed methodology including the calculation formula can be found in our rulebook:

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers a wide range of customization, in terms of component selection, weighting schemes and personalized calculation methodologies.

³ Net dividend yield is calculated as net return index return minus price index return
