

ISTOXX® EUROPE CENTENARY SELECT 30 INDEX

Index description

The iSTOXX Europe Centenary Select 30 Index selects those companies from the STOXX Europe 600 that are at least 100 years old, are expected to pay a dividend within the next month and have shown a high beta historically.

The monthly selection process includes measures to exclude low liquidity stocks and to limit the number of companies per industry. All 30 constituents are weighted according to their three-month ADTV in EUR and capped at 10%.

Key facts

» Companies are selected from one of Europe's most representative indices, the STOXX Europe 600

» Offers investment into established firms with a long history

» High liquidity is ensured by applying a EUR 15 mn ADTV filter and ADTV weighting scheme

» Attractive dividend yield thanks to an overlay that selects companies that are about to pay a dividend and by updating the portfolio monthly

Descriptive statistics

Methodology

The index universe is defined by all companies in the STOXX Europe 600 that are at least 100 years old.

In a first step, a liquidity filter is applied to the universe: Only companies with a three-month average daily trading volume (ADTV) greater than EUR 15 mn are selected. In a second step, all remaining companies whose six-month beta to the EURO STOXX 50 is above 1.5 or country of domicile represents 0.5% or less of the STOXX Europe 600 are excluded from the universe of selection.

All remaining companies are ranked in descending order by their six-month beta to the EURO STOXX 50. Among all companies that will pay a dividend within the next month, the top 20 are selected (or all of them if there are less than 20). The index composition is completed with the top constituents that are not expected to pay a dividend in the next month (with a maximum of seven constituents per industry).

DISCLAIMER

STOXX, Deutsche Brse Group and their licensors, research partners or data providers do not make any warranties or representations, express or implied, with respect to the timeliness, sequence, accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data and exclude any liability in connection therewith. STOXX, Deutsche Brse Group and their licensors, research partners or data providers are not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX, Deutsche Brse Group or their licensors, research partners or data providers on the merits of that company. Financial instruments based on the STOXX indices, DAX indices or on any other indices supported by STOXX are in no way sponsored, endorsed, sold or promoted by STOXX, Deutsche Brse Group or their licensors, research partners or data providers.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

³ Net dividend yield is calculated as net return index return minus price index return
