Methodology

The STOXX Regional Excluding Tobacco Industry Neutral ESG indices are selected from the STOXX Global 1800 universe, excluding the sub-sector Tobacco (ICB Code 45103010). STOXX will exclude the companies that Sustainalytics considers to be non-compliant with the Sustainalytics Global Standards Screening assessment as well as companies identified to be involved with controversial weapons. The indices are created by selecting companies with an Environmental (E), Social (S) and Governance (G) score ≥ 50 . A capping algorithm is applied to calculate component weights so that the ICB Industry weight of the index is similar to the ICB Industry weight of the Benchmark.

Additionally, for the Europe Excluding Tobacco version there are 2 further indices selecting the 200 and 250 companies with the highest Total Rating Score. For the North America Excluding Tobacco version there are also 2 further indices, selecting the 150 and 200 companies with the highest Total Rating Score. The Total Rating Score is provided by Sustainalytics.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.
