# BLUE-CHIP INDICES STOXX® GLOBAL 200 INDEX

#### Index description

The STOXX Global and Country blue-chip indices are fixed-number indices designed to represent the largest components by free-float market cap of their geographic region defined by the relevant benchmark indices.

## **Key facts**

» The indices are diversified, as they incorporate a capping factor to ensure that no country/component can dominate the index

» Buffers are used to achieve the fixed number of components and to maintain stability of the indices by reducing index composition changes

#### **Descriptive statistics**

| Index                   | Market cap (USD bn.) |            | Components (USD bn.) |        |         | Component weight (%) |         | Turnover (%) |                |
|-------------------------|----------------------|------------|----------------------|--------|---------|----------------------|---------|--------------|----------------|
|                         | Full                 | Free-float | Mean                 | Median | Largest | Smallest             | Largest | Smallest     | Last 12 months |
| STOXX Global 200 Index  | 34,070.5             | 31,938.6   | 159.7                | 101.5  | 2655.1  | 3.6                  | 8.3     | 0.0          | 6.0            |
| STOXX Global 3000 Index | 71,067.3             | 62,234.3   | 20.7                 | 6.1    | 2,655.1 | 0.9                  | 4.3     | 0.0          | 3.2            |

**Country weighting** 

#### Supersector weighting (top 10)

| 33.5% Technology                 | 77.0% United States |
|----------------------------------|---------------------|
| 14.9% Health Care                | 3.2% Great Britain  |
| 9.2% Industrial Goods & Services | 2.7% Japan          |
| 6.8% Retail                      | 2.6% Australia      |
| 5.9% Banks                       | 2.6% Switzerland    |
| 4.9% Energy                      | 2.4% France         |
| 4.1% Food, Bevrage & Tobacco     | 1.7% Canada         |
| 3.7% Financial Services          | 1.4% Taiwan         |
| 2.8% Telecommunications          | 1.2% India          |
| 2.3% Automobiles & Parts         | 1.1% Germany        |

## Performance and annual returns<sup>4</sup>

## Methodology

The index universe is the relevant benchmark index. To be eligible for inclusion, the three-month average daily trading volume (3-month ADTV) has to be at least 1 million euros. Components are selected on the basis of the free-float market cap and a 10% buffer rule applies for the ranking. If the number of stocks selected is still below the required component count after applying the buffer rules, the largest remaining stocks are selected until there are enough stocks. The detailed methodology including the calculation formula can be found in our rulebook:

http://www.stoxx.com/indices/rulebooks.html

#### BACKTESTED PERFORMANCE

DACH IS IED FERTORWARDE This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

#### CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers a wide range of customization, in terms of component selection, weighting schemes and personalized calculation methodologies.
