

# STOXX® GLOBAL INFRASTRUCTURE SUPPLIERS 50 INDEX

## Index description

The STOXX Global Infrastructure Suppliers 50 Index gives a diversified representation of suppliers to the infrastructure sector, with a fixed number of 50 components. To be a part of the eligible universe, 50% or more of the recent annual revenue of a company has to directly result from supplying goods or services to companies in the infrastructure sector.

## Key facts

» Prices charged by infrastructure owners are often regulated by the government, and payback periods are spread over a long period of time. Consequently, the STOXX Global Infrastructure Suppliers 50 Index provides a unique opportunity to take advantage of the sector's expansion over a shorter time period, with companies not heavily regulated by the government

» Identification of the index universe is performed by an external independent party, Revere Data, LLC (San Francisco, USA), to guarantee transparent and independent stock selection

» To get a well-diversified sector allocation and a good representation of the infrastructure companies, the largest four stocks of each sector measured by free-float market cap are chosen

## Descriptive statistics

Index	Market cap (USD bn.)		Components (USD bn.)				Component weight (%)		Turnover (%)
	Full	Free-float	Mean	Median	Largest	Smallest	Largest	Smallest	Last 12 months
STOXX Global Infrastructure Suppliers 50 Index	295.0	258.0	5.2	2.9	38.6	0.1	15.0	0.0	19.5
STOXX Global 200 Index	34,071.8	31,939.9	159.7	101.5	2,655.1	3.6	8.3	0.0	6.0

## Supersector weighting (top 10)

STOXX Global Infrastructure Suppliers 50 Index	25.7	15.2	19.8	15.2	1.9	2.0	0.6	9.3
STOXX Global 200 Index	22.3	19.2	21.7	19.1	0.1	1.6	2.7	24.8

Performance and annual returns<sup>4</sup>

## Methodology

Selection is performed on the basis of free-float market cap and liquidity criteria. Only stocks from the STOXX Global Total Market Index (TMI) (minus China A-shares) with an three-month average daily trading value (3-month ADTV) of more than 1 million US dollars can be part of the index. The largest four stocks of each sector measured by free-float market cap are chosen for the STOXX Global Infrastructure Suppliers 50 Index. Remaining components are selected from the next largest stocks, regardless of the sector. Each sector is capped at 20%. A component-level capping is triggered should the second largest component hit a 1% weight mark. The detailed methodology including the calculation formula can be found in our rulebook:

## DISCLAIMER

STOXX, Deutsche Börse Group and their licensors, research partners or data providers do not make any warranties or representations, express or implied, with respect to the timeliness, sequence, accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data and exclude any liability in connection therewith. STOXX, Deutsche Börse Group and their licensors, research partners or data providers are not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX, Deutsche Börse Group or their licensors, research partners or data providers on the merits of that company. Financial instruments based on the STOXX® indices, DAX® indices or on any other indices supported by STOXX are in no way sponsored, endorsed, sold or promoted by STOXX, Deutsche Börse Group or their licensors, research partners or data providers.

## BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

## CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers a wide range of customization, in terms of component selection, weighting schemes and personalized calculation methodologies.

<sup>3</sup> Net dividend yield is calculated as net return index return minus price index return
