STYLE INDICES STOXX® GLOBAL LOW RISK WEIGHTED DIVERSIFIED 200 INDEX

Index description

The STOXX Global Low Risk Weighted Diversified 200 Index represents 200 low volatility companies from the STOXX Global 1800. The selection is subject to diversification rules. Constituents are selected based on their 12-month historical volatility and weighted by the inverse of their 12-month historical volatility capped by component, industry and country constraints.

Key facts

»200 low volatility companies from the STOXX Global 1800

»The indices provide an alternative weighting concept based on stock price volatility rather than market cap

»Industry and country constraints are applied to ensure diversification

Performance and annual returns⁴

Methodology

Components are selected based on the 12-month historical volatility ranking. Components are ranked from lowest to highest volatility and are subject to diversification rules. Weights are calculated by using the inverse of the 12-month historical volatility and are subject to component, country and industry constraints. The detailed methodology, including calculation formula and full requirements, can be found in our rulebook:

www.stoxx.com/indices/rulebooks

DISCLAIMER

STOXX, Deutsche Boerse Group (DBAG) and their licensors, research partners or data providers do not make any warranties or representations, express or implied, with respect to the timeliness, sequence, accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data and exclude any liability in connection therewith. STOXX, DBAG and their licensors, research partners or data providers are not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX, DBAG or their licensors, research partners or data providers or the merits of that company. Financial instruments based on the STOXX® indices, DAX® indices or on any other indices supported by STOXX are in no way sponsored, endorsed, sold or promoted by STOXX, DBAG or their licensors, research partners.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

³ gr. div. yield is calculated as gr. return index return minus price index return ⁴ STOXX data from Jan. 02, 2004 to May 31, 2023
