

STOXX® GLOBAL TECHNOLOGY SELECT 30 EUR INDEX

Index description

The STOXX Global Technology Select 30 EUR and USD indices measure the performance of low-risk stocks characterised by low volatility and high dividend yield from a pool of global Technology stocks.

The index uses the market standard Industry Classification Benchmark (ICB) to categorise companies according to their primary source of revenue. This guarantees a professional and accurate classification of companies in their respective business environments. There are four levels of classification ranging from broad to very detailed: 10 industries are broken down into 19 supersectors, 41 sectors and 114 subsectors.

Key facts

- »Broad and liquid universe.
- »Lower volatility stocks receive the highest weights.
- »Exposure to a single ICB industry.

Descriptive statistics

Index	Market cap (EUR bn.)		Components (EUR bn.)				Component weight (%)		Turnover (%)
	Full	Free-float	Mean	Median	Largest	Smallest	Largest	Smallest	Last 12 months

Methodology

The base universe is defined by the STOXX® Global 1800. All stocks belonging to the Technology industry are screened for 12-month historical daily pricing data and 12-month historical dividend yield. If one or both values are not available for a stock, the company is removed from the base universe.

All remaining stocks are then ranked in ascending order in terms of volatility and all stocks which do not belong to the top x% are excluded (x being calculated as the square root of the number of stocks in the base universe divided by the target number of stocks in the Select index).

All remaining stocks are then ranked in descending order in terms of 12-month historical dividend yield and the top x% are selected to be included in the Select index. Those constituents are weighted according to the inverse of their volatility, with a cap at 10%. The composition is reviewed quarterly.

The detailed methodology including the calculation formula can be found in our rulebook:

Quick facts

Weighting	Inverse volatility weighted
No. of components	30
Review frequency	Quarterly, in Mar., Jun., Sep., Dec.
Calculation/distribution	Price, Net Return and Gross Return in EUR and USD
Calculation hours	00:0022:00 CET
Base value/base date	100 as of Mar. 22, 2004
History	Available daily back to Mar. 22, 2004
Inception date	Aug. 9, 2017

To learn more about the inception date, the currency, the calculation hours and historical values, please see our data vendor code sheet.

DISCLAIMER

STOXX, Deutsche Boerse Group (DBAG) and their licensors, research partners or data providers do not make any warranties or representations, express or implied, with respect to the timeliness, sequence, accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data and exclude any liability in connection therewith. STOXX, DBAG and their licensors, research partners or data providers are not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX, DBAG or their licensors, research partners or data providers on the merits of that company. Financial instruments based on the STOXX® indices, DAX® indices or on any other indices supported by STOXX are in no way sponsored, endorsed, sold or promoted by STOXX, DBAG or their licensors, research partners or data providers.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

³ gr. div. yield is calculated as gr. return index return minus price index return
