Methodology

Companies that are non-compliant based on the Sustainalytics Global Standards Screening assessment, ESG Risk Ratings or are involved in Controversial Weapons are not eligible for selection. Additional exclusion filters are applied, screening companies for involvement in Tobacco, Thermal Coal, Unconventional Oil & Gas, Small Arms and Military Weapons. The remaining securities are ranked in descending order of their ESG scores within each of the 11 ICB Industry groups. The STOXX ESG Broad Market Indices select the top-ranking securities in each of the ICB Industries until the number of selected securities reaches 80% of the number of securities in the underlying index. The selection is applied across all industry groups, selecting the highest scorers and preserving the 80% selection ratio within each of the industry groups. The indices are reviewed quarterly, and components are weighted by free-float market capitalization, with a maximum capped weight of 10%. Deleted companies are not replaced.
