Methodology

The weighting of each constituent security in STOXX ESG Target TE Indices is determined by optimization to minimize the tracking error to the benchmark index. In addition, the methodology constrains the ESG to a minimum value, quarterly turnover to a maximum value, and limits the active country and industry exposures.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.
