

STOXX® CANADA TOTAL MARKET MID INDEX

Index description

The STOXX Total Market Size indices provide a representation of large, mid, and small cap companies within a specific region. They are derived from the STOXX Global Total Market indices.

Key facts

- » Transparent and rules-based methodology
- » Buffer rule aims to reduce turnover
- » Weighted by free-float market cap

null	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

Performance and annual returns⁴

Methodology

Example: Large Index

On a quarterly basis, companies in the given STOXX Total Market Index are ranked in terms of their total market cap in descending order. The largest companies covering a total market cap of 67.5% are selected. Current large companies with a total market cap ranked between the 67.5th and 75th percentiles of the cumulative total market cap are also selected. The components are then weighted according to free-float market cap without weight restrictions and capping. The detailed methodology including the calculation formula can be found in our rulebook:

DISCLAIMER

STOXX, Deutsche Börse Group and their licensors, research partners or data providers do not make any warranties or representations, express or implied, with respect to the timeliness, sequence, accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data and exclude any liability in connection therewith. STOXX, Deutsche Börse Group and their licensors, research partners or data providers are not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX, Deutsche Börse Group or their licensors, research partners or data providers on the merits of that company. Financial instruments based on the STOXX® indices, DAX® indices or on any other indices supported by STOXX are in no way sponsored, endorsed, sold or promoted by STOXX, Deutsche Börse Group or their licensors, research partners or data providers.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers a wide range of customization, in terms of component selection, weighting schemes and personalized calculation methodologies.

³ gr. div. yield is calculated as gr. return index return minus price index return
