

EURO STOXX 50® MULTI-ASSET INDICES

THE BLUE-CHIP EUROZONE INDEX...

EURO STOXX 50® is the unmatched blue-chip equity index that is established as the gauge of the Eurozone equity market.

...NOW HAS A NEW DIMENSION

The newly created EURO STOXX 50® Multi-Asset index family enables a cross-asset allocation strategy with pre-defined fixed exposure levels to the equity and bond asset classes.

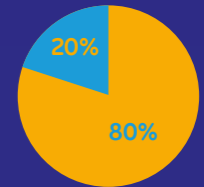

Different combinations of the equity and bond exposures offer investors the possibility to construct efficient portfolios according to their individual preferences as well as the macroeconomic factors such as economic growth and interest rate environment.

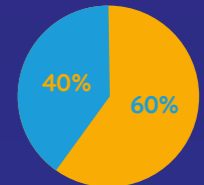

CROSS-ASSET EXPOSURE

The cross-asset concept allows a more diversified and balanced investment approach across all its combinations with varying degrees of bond and equity exposure.

KEY FACTS

REAL-TIME CALCULATION
EURO STOXX 50® Multi-Asset Indices calculations are performed in real-time providing enhanced market transparency, robustness and credibility.

DIVERSE INVESTOR PROFILE STRATEGIES
Every possible combination of equity and bond exposures is found to offer efficient portfolios to investors, according to their individual risk preferences.

ACCESSIBLE INDEX METHODOLOGY
The methodology used is straightforward, transparent and rules-based, which makes it fully accessible and coherent for investors.

STABILITY AND DIVERSIFICATION

All combinations are screened to ensure liquidity and investability. As such, the indices are perfectly suited as underlying for financial products such as exchange-traded funds (ETFs) and derivatives.

EURO STOXX 50® goes Multi-Asset.
