Regulation Clause	Regulation Subclause	Required Information	STOXX LTD Statement
<p>1. General Disclosure Requirements</p>			
<p>1.1 Date of Publication</p>	<p>Art. 1(1)(a) Commission Delegated Regulation (EU) 2018/1643 ("RTS")</p>	<p>The benchmark statement shall state: the date of publication of the statement and the date of the most recent statement update.</p>	<p>Date of Publication August 2019</p> <p>Date of Update Not Applicable</p>
<p>1.2 Definition of the market or economic reality and circumstances in which such measurement may become unreliable</p>	<p>Art. 27(1)(3) of Regulation (EU) 2016/1011 ("BMR"); Art. 1(2) RTS; Art. 1(3) RTS</p>	<p>The benchmark statement shall clearly and unambiguously define the market or economic reality measured by the benchmark and the circumstances in which such measurement may become unreliable.</p>	<p>Definition of market or Economic Reality</p> <p>The STOXX Factor Index Family aims to measure the performance of portfolios of equity securities which are designed to provide exposure to certain variables known as factors, these factors can assist in the explanation of market performance. Factors may be either extrinsic or intrinsic: extrinsic factor groupings include inter alia, volatility and variance, momentum, liquidity and Sharpe Ratio; intrinsic factor groupings include inter alia, price to earnings ratio, dividend yields and balance sheet strength measures. Portfolios may be constructed for sensitivity to a unique factor or a combination of factors.</p> <p>STOXX applies clear and transparent rules to both the eligibility and selection criteria for all securities within each component index. This family includes benchmarks where the portfolios are weighted by free-float market capitalisation; portfolios may also include a cap or be equally weighted such that certain securities do not dominate the portfolio; portfolios may also be weighted to reduce their risk by using volatility or variance weighting schemes.</p> <p>The base currency of the STOXX Factor Index Family is EUR.</p>

			<p>The indices within the STOXX Factor Index Family include benchmarks that measure the performance of various geographic and market segments. The geographic sectors currently include individual countries and regions as well as Developed and Emerging markets. The market sectors currently include both size and industrial classification factors.</p> <p>Benchmarks are calculated using different calculation rules. For example:</p> <ul style="list-style-type: none"> - they are calculated on a price only basis, without dividends; - they are calculated on a total return basis; with dividends reinvested; - they are calculated on a total return basis; with dividends reinvested net of withholding taxes; - they are calculated on individual countries and regional combinations of countries; - they are calculated according to size factors, - they are calculated according to industrial classification factors, - they are calculated with the addition or subtraction of fixed amounts, - they are calculated in currencies other than EUR. <p>Circumstances in which such measurement may become unreliable:</p> <p>The STOXX Factor Index Family uses as input data for equities official closing prices sourced from Thomson Reuters as well as directly from eligible stock exchanges. Interest rates are sourced from Thomson Reuters. Foreign exchange rates are sourced from Thomson Reuters Benchmark Services. The measurement of the market or economic reality may become unreliable if one or more of the eligible stock exchanges ceased to operate but the constituent securities affected continued to trade elsewhere.</p>

1.3 Discretion	Art. 27(1)(3)(b) BMR	The benchmark statement shall lay down technical specifications that clearly and unambiguously identify the elements of the calculation of the benchmark in relation to which discretion may be exercised, the criteria applicable to the exercise of such discretion and the position of the persons that can exercise discretion, and how such discretion may be subsequently evaluated.	<p>The rules and procedures to which the STOXX Factor Index Family must adhere to are written with the express intention of removing the need for any discretion in so far as this is feasible.</p> <p>Where the existing methodology does not fully prescribe how an event should be dealt with or a complex or an unexpected operational event occurs (e.g. a complex corporate action or a market disruption) then discretion may need to be applied. STOXX has a clear set of procedures for dealing with events that require discretion and will apply these procedures to determine the appropriate treatment. Depending on the nature of the event, the issue will initially be dealt with by either, the Index Operations Committee (“IOC”) or the Index Management Committee (“IMC”). These committees both consist of senior, full-time members of STOXX’s staff and will evaluate and document all occurrences in which discretion may need to be used. The IOC or IMC, as appropriate, will then send their evaluation to the Index Governance Committee (“IGC”) for oversight. The IGC consists of the senior management of STOXX. The subsequent evaluation of the use of discretion will be evaluated by the Oversight Committee (“OC”) which includes external representatives and representatives from the compliance and regulatory functions.</p>
1.4 Notice regarding changes to, or the cessation of, the benchmark	Art. 27(1)(3)(c) BMR	The benchmark statement shall provide notice of the possibility that factors, including external factors beyond the control of the administrator, may necessitate changes to, or the cessation of, the benchmark.	It is possible that certain factors, including external circumstances beyond the control of STOXX, will lead to changes or even cessation of an index within the Index Family.
1.5 Advice concerning material	Art.	The benchmark statement shall advise users that changes to, or	Any financial contracts or instruments that reference any member of the STOXX Factor Index Series Family or any investment funds that measure their performance

These financial contracts, financial products and investment funds must be able to withstand, or at least address the issue of, any changes to or cessation of a family member.
1.6 Rationale; review and approval procedures	Art. 27(2)(b) BMR; Art. 1(5) RTS	<p>A benchmark statement shall contain at least, the rationale for adopting the benchmark methodology and procedures for the review and approval of the methodology.</p> <p>In specifying the procedures for review of the methodology, the benchmark statement shall at least outline the procedures for public consultation on any material changes to the methodology.</p>	<p>Rationale for adopting the benchmark methodology:</p> <p>The STOXX Factor Index Family methodology is designed so that it can appropriately measure the economic reality previously described in Statement 1.2.</p> <p>Procedures for review of the methodology:</p> <p>The new index approval process is managed by the Product Approval Committee (“PAC”), and the IGC assesses the ongoing suitability of any index or family of indices on at least an annual basis.</p> <p>Procedures for public consultations:</p> <p>Any methodology changes that are deemed material ones by the IMC will be subject to public consultation. Stakeholders will be informed of the consultation by notification and an announcement will be made on the STOXX website. 1.7 Criteria and procedures used to determine the benchmark	Art. 27(2)(c) BMR	The criteria and procedures used to determine the benchmark, including a description of the input data, the priority given to different types of input data, the minimum data needed to determine a benchmark, the use of any models or methods of extrapolation and any procedure for rebalancing the constituents of a benchmark's index;	<p>interest and to reflect this change the benchmark itself needs amending. Other material changes are where a benchmark: changes its objective; changes its calculation methods; changes its compositions and weightings; changes the way it is operationally maintained e.g. changes the way it deals with certain corporate actions. The IGC will carefully take note of any opinions received during the one-month consultation period and take note of them in deciding whether to proceed with the proposed change.</p> <p>The STOXX Factor Index Family uses as input data for equities official closing prices sourced from Thomson Reuters as well as data sourced directly from eligible stock exchanges. Interest rates are sourced from Thomson Reuters. Foreign exchange rates are sourced from Thomson Reuters Benchmark Services. STOXX considers all this data as readily available. All calculations, criteria and procedures used in the rebalancing of index family members is clearly shown in the relevant section of each family member's manual.</p>
1.8 Controls and rules that govern any exercise of judgement or discretion	Art. 27(2)(d) BMR; Art. 1(4) RTS	The benchmark statement shall include the controls and rules that govern any exercise of judgement or discretion by the administrator or any contributors, to ensure	The circumstances that may cause an exercise of judgement or discretion as well as the controls and policies that govern any exercise of judgement are as set out above in Statement 1.3. STOXX keeps a written record of all circumstances in which judgement has been used by the IOC, IMC and, if applicable, any comments from the IGC.

		<p>consistency in the use of such judgement or discretion.</p> <p>In specifying the controls and rules that govern any exercise of judgement or discretion by the administrator or any contributors in calculating the benchmark or benchmarks, the benchmark statement shall include an outline of each step of the process for any ex post evaluation of the use of discretion, together with a clear indication of the position of any person(s) responsible for carrying out the evaluations;</p>	
<p>1.9 Determination in periods of stress</p>	<p>Art. 27(2)(e) BMR</p>	<p>The benchmark shall include procedures which govern the determination of the benchmark in periods of stress or periods where transaction data sources may be insufficient, inaccurate or unreliable and the potential</p>	<p>Certain external events can make it difficult or impossible to trade securities on certain Stock Exchanges. Examples of such events include: government restrictions on the repatriation of international capital; temporary closure of stock exchanges; imposition of sanctions upon a country which prevents new investment. By their very nature, the course of these events is often uncertain. In dealing with these issues the IOC, IMC and IGC will ensure that any decisions taken will be communicated to stakeholders on a timely basis by notification and by announcement on the STOXX website. If the conditions are expected to persist for a long period of time and index consultation, as outlined in Statement 1.6, may need to be enacted.</p>

1.10 Procedures for dealing with errors	Art. 27(2)(f) BMR	<p>limitations of the benchmark in such periods.</p> <p>The benchmark shall also include the procedures for dealing with errors in input data or in the determination of the benchmark, including when a re-determination of the benchmark is required.</p>	<p>The STOXX Factor Index Family is recalculated without delay whenever an error in input data is detected and it is technically and operationally feasible to do so. An index may need to be suspended whilst an error is being investigated and corrected. All users of the benchmark are notified immediately of any occurrence that leads to a suspension and further notified prior to an index resumption. Where a re-determination occurs, users are fully notified when the index re-determination has been applied retrospectively.</p>
1.11 Identification of potential limitations	Art. 27(2)(g) BMR; Art. 1(3) RTS	<p>The benchmark shall include the identification of potential limitations of the benchmark, including its operation in illiquid or fragmented markets and the possible concentration of inputs.</p> <p>In defining the potential limitations of the benchmark [and the circumstances in which the measurement of the market or economic reality may become unrealisable, the benchmark statement shall include at least:</p>	<p>Potential limitations in the STOXX Factor Index Family occur when a significant proportion of the constituent securities of a family member have no official closing prices available. These limitations can occur during periods of market stress as outlined in Statement 1.9. However, limitations may occur due to technical reasons, for example the inability of a stock exchange to publish a close price due to a computer outage.</p>

Regulation Clause	Regulation Subclause	Required Information	STOXX LTD Statement
		<p>(a) a description of the circumstances in which the administrator would lack sufficient input data to determine the benchmark in accordance with the methodology;</p>	<p>(a) STOXX uses official closing levels for calculation of all family members, however where limitations exist it may be necessary to use the last traded price. This ensures that the value of financial instruments and the pay-offs calculated for financial contracts can be determined.</p>
		<p>(b) where relevant, a description of instances when the accuracy and reliability of the methodology used for determining the benchmark can no longer be ensured, such as when the administrator deems the liquidity in the underlying market as insufficient;</p>	<p>(b) Emerging Market securities can occasionally suffer from an absence of liquidity which makes their economic or market reality unrealisable. STOXX therefore undertakes regular screenings of Emerging Market stocks by reviewing their most recent daily average trading volumes; if any security lacks suitable liquidity it will no longer be available for index selection.</p>
		<p>(c) any other information that administrator reasonably considers to be relevant or useful to</p>	<p>(c) Benchmarks in the STOXX Factor Index Family may become unreliable due to an exceptional market event that causes a significant proportion of the underlying securities to become suspended from trading for reasons such as delisting, nationalisation, insolvency or administration. Where an exceptional</p>
