| 5. CHANGES TO THE FILES GUIDE | 5. | CHANGES TO THE FILES GUIDE |
|-------------------------------|----|----------------------------|
|-------------------------------|----|----------------------------|

## 1. Introduction

The DAX Files Guide aims at providing an overview of the files structure produced for DAX Indices. It may facilitate the development of automated solution to retrieve data by DAX Customers.

The DAX Files guides should be read in conjunction with the DAX Index Methodology and Guides available on <u>Resources - Qontigo (dax-indices.com)</u>.

For each file, the following information will be provided:

| Column ID   | Column Number  |
|-------------|--|
| Attribute   | Column Name  |
| Description | Description of data field  |
| Data Type   | Date Type: Text / Number / Date  |
| Data Format | Data format of the field: Text (Length), Number (Decimals), Date (date format) |

For questions regarding the DAX Files Guide, please contact our STOXX Customer Support team:

- > Phone: +41 43 430 72 72
- > E-Mail: customersupport@stoxx.com

### 1.1. Naming Convention

The naming convention for the description of the file name in the DAX Files Guide is

xxxxx – Index Name

**YYYYMMDD** – date at which report is generated

### 1.2. Naming convention associated to Third-Party Data Licenses

Files may be generated in multiple versions accordingly to the Third Party Data license the client is entitled to. The following table provides an overview of the different Components File name and the Third Party Data excluded.

The File name will contain 4 characters P### to allow the identification of third party data being displayed:

• FileName\_P###\_xxxxx with P### = Permissioned Third Party data,

Important Note: whenever a new 3rd-party license gets added into the system, the file names will change for clients who don't have the new 3rd-party license!

License Entitlements per Client: For demonstration, each entitlement below has got a different entitlement and hence access to a different version of the components file.

|               | 3rd-Party<br>(SEDOL) | 3rd-Party<br>B licence | 3rd-Party<br>C licence | 3rd-Party<br>D licence | SUM | Entitlement to File     | Active |
|---------------|----------------------|------------------------|------------------------|------------------------|-----|-------------------------|--------|
| Value         | 1                    | 2                      | 4                      | 8                      |     |                         |        |

Files for which a Third-Party Data segregation is implemented have a reference to this section.

## 2. Equity Index Files

### 2.1. Index Composition Report

#### 2.1.1.Standard (xls) format

This report contains both index and constituent information based on market closing values and indicators as of last rebalancing date. The file is publicly available on DAX Website and MD+S Interactive platform for licensed users.

> File name:

xxxxx\_ICR.YYYYMMDD.xls

- > File type: .xls
- > File frequency: daily at COB

The report consists of three tabs:

- 1. Cover displays file and index name, report date and Customer Support contact details
- 2. Data index and constituent closing data
- 3. Info Displays Customer Support contact details and a legend of measures used in calculation

The file specifications will cover tabs "Data".

Data starts at Row 6.

| Column<br>ID | Attribute  | Description   | Data<br>Type | Data<br>Format |

### 2.3. Index Weightings File

This report contains both index and constituent information based on market closing values as well as index and constituent adjustments to be effective the next index dissemination day. The file is available on MD+S Interactive platform for licensed users.

> File name:

#### xxxxx\_Weighting\_File.YYYMMDD.xls

- File type: .xls >
- File frequency: daily at COB >

The report consists of four tabs:

- 1. Cover displays file and index name, report date and Customer Support contact details
- 2. Index navigation page to switch between tabs
- 3. Data for today index and constituent closing data
- 4. Data for next day index and constituent data adjusted for the next dissemination day

The file specifications will cover tabs "Data for today" and "Data for next day".

#### 2.3.1.DAX National Indices

Constituent related data starts at Row 8.

| Column<br>ID | Attribute             | Description   | Data<br>Type | Data<br>Format |

#### 2.3.3.DAX Dividend Point Indices

This report contains dividend points for each constituent in the index. The file is available on MD+S Interactive platform for licensed users.

> File name:

> DAXDividendPoints\_Weighting\_File.YYYYMMDD.xls DivDAXDividendPoints\_Weighting\_File.YYYYMMDD.xls

- File type: .xls >
- > File frequency: daily at COB

The report consists of four tabs:

- 1. Cover displays file and index name, report date and Customer Support contact details
- 2. Index navigation page to switch between tabs
- 3. Data dividend point

The file specifications will cover tab "Data".

Constituent related data starts at Row 8.

| Column<br>ID | Attribute            | Description                        | Data<br>Type | Data<br>Format |

### 2.4. Index Weightings SEDOL

This report contains both index and constituent information based on market closing values as well as index and constituent adjustments to be effective the next index dissemination day. The file is produced only for selected DAXglobal and DAXplus indices. The file is available on MD+S Interactive platform for licensed users.

> File name:

xxxxx\_Weighting\_File\_ext.YYYYMMDD.xls

- > File type: .xls
- > File frequency: daily at COB

The report consists of four tabs:

- 1. Cover displays file and index name, report date and Customer Support contact details
- 2. **Index** navigation page to switch between tabs
- 3. Data for today index and constituent closing data
- 4. Data for next day index and constituent data adjusted for the next dissemination day

The file specifications will cover tabs "Data for today" and "Data for next day".

Constituent related data starts at **Row 9**.

#### 2.5. Index Weightings Basic

This report contains both index and constituent information based on market closing values as well as index and constituent adjustments to be effective the next index dissemination day. The file is available on MD+S Interactive platform for licensed users.

#### 2.5.1.Standard (xls) format

The standard format includes both current day and next dissemination day data in the same file.

> File name:

xxxxx\_IWB.YYYYMMDD.xls

- > File type: .xls
- > File frequency: daily at COB

The report consists of four tabs:

- 1. Cover displays file and index name, report date and Customer Support contact details
- 2. Data for today index and constituent closing data
- 3. Data for next day index and constituent data adjusted for the next dissemination day
- 4. Info Displays Customer Support contact details and a legend of measures used in calculation

The file specifications will cover tabs "Data for today" and "Data for next day".

### 2.6. Index Weightings Premium

#### 2.6.1.Standard (xls) format

This report contains both index and constituent information based on market closing values as well as index and constituent adjustments to be effective the next index dissemination day. It also includes various statistical measures. The file is available on MD+S Interactive platform for licensed users and generated in multiple versions according to the Third-Party Data license the client is entitled to.

- > File name:
  - xxxxx\_IWP.YYYMMDD.xls
  - xxxxx\_IWP\_P001.YYYYMMDD.xls with P001 Permissioned Third-Party data as described in section 1.2 of the DAX File Guide
- > File type: .xls
- > File frequency: daily at COB

The report consists of four tabs:

- 1. Cover displays file and index name, report date and Customer Support contact details
- 2. Data for today index and constituent closing data
- 3. **Data for next day** index and constituent data adjusted for the next dissemination day
- 4. Info Displays Customer Support contact details and a legend of measures used in calculation

The file specifications will cover tabs "Data for today" and "Data for next day".

Data starts at Row 6.

### 2.7. Index Weightings Currency

This report contains both index and constituent information based on market closing values as well as index and constituent adjustments to be effective the next index dissemination day for the currency versions of selected index. The file is available on MD+S Interactive platform for licensed users and generated in multiple versions according to the Third-Party Data license the client is entitled to.

- > File name:
  - xxxxx\_IWC.YYYYMMDD.xls
  - xxxxx\_IWC\_P001.YYYYMMDD.xls with P001 Permissioned Third Party data as described in section 1.2 of the DAX File Guide
- > File type: .xls
- > File frequency: daily at COB

The report consists of four tabs:

- 1. **Cover** displays file and index name, report date and Customer Support contact details
- 2. Data for today index and constituent closing data
- 3. Data for next day index and constituent data adjusted for the next dissemination day
- 4. Info Displays Customer Support contact details and a legend of measures used in calculation

The file specifications will cover tabs "Data for today" and "Data for next day".

Data starts at Row 6.

| Column<br>ID | Attribute            | Description   | Data Type | Data<br>Format |

| 21 | Constant A                                      | Index Base value to be used in conjunction with Fi factor   | Number | 7   |
| 22 | Currency base value<br>(Euro to index currency) | Currency base value EUR to index currency   | Number | 8   |
| 23 | Currency rate (Euro to index currency)          | Currency exchange rate EUR to index currency  | Number | 5   |
| 24 | Kt  | Index Chaining Factor   | Number | 7   |
| 25 | Market Cap (in Mio.<br>index currency) (Index)  | Index Market Capitalisation (in millions)   | Number | 2   |
| 26 | # Constituents                                  | Number of Index Constituents  | Number | 0   |
| 27 | pit (close) in index<br>currency                | Closing price of constituent on report date (in index currency)   | Number | 3   |
| 28 | pit (local)                                     | Closing price of constituent on report date (in local currency)   | Number | 3   |
| 29 | Currency Rate (Local to<br>Index Currency)      | Currency exchange rate: Constituent currency to index currency  | Number | 3   |
| 30 | pi0 (Euro)                                      | Opening price of constituent on the trading day before the first inclusion in the index (in EUR)  | Number | 3   |
| 31 | qi0   | Number of shares of constituent on the first inclusion in the index   | Number | 0   |
| 32 | qit   | Number of shares of constituent on report date  | Number | 0   |
| 33 | ffit  | Free float factor of constituent on report date   | Number | 4   |
| 34 | ci  | Adjustment factor of the constituent  | Number | 6   |
| 35 | Market Cap. (in Mio.<br>index currency)         | Market Capitalisation on report date (in millions)  | Number | 2   |
| 36 | Weight  | Weighting of the constituent in the index   | Number | 4   |
| 37 | Fi  | Weighting factor F of the constituent (provides information on the<br>number of shares required from each constituent to track the<br>underlying portfolio) – performance index | Number | 5   |

#### 2.8. Business Forecast

#### 2.8.1.Standard format

This report displays future index composition and underlying data that will be implemented at the next chaining date for DAX and DAXglobal Indices. The file is available on MD+S Interactive platform for licensed users.

> File name:

xxxxx\_BF.YYYYMMDD.xls, where YYYYMMDD is quarterly review effective date

> File type: .xls

> File frequency: quarterly, one trading day (before 9 a.m. CET) before chaining date in March, June, September, December

The report consists of three tabs:

- 1. Cover displays file and index name, report date and Customer Support contact details
- 2. **Data** displays index and constituent future data
- 3. Info displays Customer Support contact details and a legend of measures used in calculation

The file specifications will cover tab "Data".

Data starts at Row 6.

| 13           | Constant A                      | Index Base value to be used in conjunction with Fi factor (two days before review implementation)   | Number       | 7              |
| 14           | Market Cap (in Mio.)<br>(Index) | Index Market capitalisation in index currency on report date (in millions) (two days before review implementation)  | Number       | 2              |
| 15           | # Constituents                  | Number of Index constituents  | Number       | 0              |
| 16           | pi0                             | Closing price of constituent on the trading day before the first inclusion in the index   | Number       | 3              |
| 17           | pit                             | Closing price of constituent on report date (two days before review implementation)   | Number       | 3              |
| 18           | qi0                             | Number of shares of constituent on the first inclusion in the index   | Number       | 0              |
| 19           | qit                             | Number of shares of constituent to be effective after review implementation   | Number       | 0              |
| 20           | ffit                            | Free float factor of constituent to be effective after review implementation  | Number       | 4              |
| 21           | ci                              | Adjustment factor of the constituent  | Number       | 6              |
| 22           | Market Cap. (in Mio)            | Market Capitalisation on report date (in millions)  | Number       | 4              |
| 23           | Weight                          | Weighting of the constituent in the index   | Number       | 4              |
| 24           | Capped Ind                      | Indicator whether constituent is capped ("Y" or "N")  | Text         | 1              |

#### 2.8.2.DAXplus Maximum Dividend

This report displays future index composition and underlying data that will be implemented at the next chaining date for DAXplus Maximum Dividend Index. The file is available on MD+S Interactive platform for licensed users.

> File name:

DAXplusMaximumDividendIndices\_BF.YYYYMMDD.csv, where YYYYMMDD is review effective date

- > File type: .csv
- > File specification: semicolon separated
- > File frequency: semi-annual, one trading day (before 9 a.m. CET) before chaining date in May and November

| Column<br>ID | Attribute            | Description   | Data<br>Type | Data<br>Format |
|--------------|----------------------|---|--------------|----------------|
| 1            | FACT_DATE            | Review cut-off date   | Date         | dd.mm.yyyy     |
| 2            | ISIN                 | Constituent ISIN  | Text         | 12             |
| 3            | INSTRUMENT_NAME      | Constituent name  | Text         | 255            |
| 4            | DIVIDEND_<br>IN_EURO | Projected dividend amount to be paid in the next 6 months, in EUR | Number       | 7              |
| 5            | PIT_CLOSE            | Constituent closing price on cut-off date                         | Number       | 3              |
| 6            | DIVIDEND_YIELD       | Constituent projected dividend yield                              | Number       | 9              |
| 7            | WEIGHT_UNCAPPED      | Indicative weight in the future index composition (uncapped)      | Number       | 9              |
| 8            | WEIGHT_FINAL         | Indicative weight in the future index composition (final)         | Number       | 9              |

### 2.9. Corporate Actions Forecast

This report displays upcoming dividends and corporate actions for the index constituents. The file is available on MD+S Interactive platform for licensed users.

> File name:

#### xxxxx\_CA\_Forecast.YYYYMMDD.xls

- > File type: .xls
- > File frequency: twice daily (~09:30 CET and ~17:30 CET)

The report consists of two tabs:

- 1. Cover displays file and index name, report date and Customer Support contact details
- 2. **Corporate Action Forecast** displays constituent future corporate actions

The file specifications will cover tab "Corporate Action Forecast". The forecast is split into two section – corporate actions effective on from T (date of report production) to T+3, and corporate actions effective from T+4 to T+10. The first section starts at **Row 14**, the second section moves depending on how many corporate actions are in the first section.

#

| 21           | COMMENTS                 | Additional Comments or Empty  | Text         | 255            |

### 2.10. Index Ranking – Core

Core ranking lists are produced for selection indices (DAX, MDAX, SDAX, TecDAX, DAX ex Financials 30 and DAX 50 ESG) in order to determine replacements for any stock deleted from the indices due to a corporate action and are publicly available. The template differs for main selection indices and Scale 30. The file is publicly available on DAX Website and MD+S Interactive platform for licensed users.

#### 2.10.1. Selection indices – CSV format

- > File name: xxxxx\_SL.YYYYMMDD.csv, where YYYYMMDD is the ranking creation date
- > File type: .csv
- > File specification: semicolon separated
- > File frequency: monthly (exact time depends on index methodology)

| Column<br>ID | Attribute                    | Description  | Data Type | Data Format |
|--------------|------------------------------|--|-----------|-------------|
| 1            | Date                         | Date at which the file is generated  | Date      | DD.MM.YYYY  |
| 2            | Cut-off Date                 | Ranking list cut-off date  | Date      | DD.MM.YYYY  |
| 3            | Index Trading Symbol         | Index Trading Symbol or Alpha code if Index Trading Symbol is unavailable  | Text      | 4           |
| 4            | Index Name                   | Index Name   | Text      | 255         |
| 5            | Index ISIN                   | Index ISIN   | Text      | 12          |
| 6            | Trading Symbol               | Constituent Trading Symbol   | Text      | 4           |
| 7            | Instrument                   | Constituent Name   | Text      | 255         |
| 8            | ISIN                         | Constituent ISIN   | Text      | 12          |
| 9            | Current Index<br>Membership  | Constituent Index Membership   | Text      | 6           |
| 10           | Rank MarketCap               | Current month constituent ranking by Market Capitalization   | Number    | 0           |
| 11           | ESG Rank                     | Current month constituent ranking by ESG score – only display for ESG indices  | Number    | 0           |
| 12           | Index Membership<br>Possible | Indicator whether constituent is eligible to enter the index ("No" or blank)   | Text      | 2           |
| 13           | Comment                      | Additional Comments or Empty ("Other share type in selection<br>index", "Other share type is ranked", "Exclusion List", "30 days rule,<br>"No VWAP", "ESG criteria not fulfilled", "No ESG score available" or<br>blank) | Text      | 255         |

The comments are displayed in the following order taking into account if a security is a component or not of a selection index

| Comment                             | Order |
|-------------------------------------|-------|
| Other share type in selection index | 1     |
| Other share type is ranked          | 2     |
| Exclusion List                      | 3     |
| 30 days rule                        | 4     |
| No VWAP                             | 5     |
| blank                               | 6     |

In case the ranking is prepared for the DAX 50 ESG, only the following two comments are displayed:

| Comment                    | Order |
|----------------------------|-------|
| No ESG score available     | 1     |
| ESG criteria not fulfilled | 2     |

#### 2.10.2. Scale 30 – CSV format

> File name: Scale30EUR\_SL.YYYYMMDD.csv, where YYYYMMDD is the ranking list creation date

> File type: .csv

- > File specification: semicolon separated
- > File frequency: monthly (exact time depends on index methodology)

| Column<br>ID | Attribute                   | Description  | Data<br>Type | Data<br>Format |
|--------------|-----------------------------|--|--------------|----------------|
| 1            | Date                        | Date at which the file is generated  | Date         | DD.MM.YYYY     |
| 2            | Cut-off Date                | Ranking list cut-off date  | Date         | DD.MM.YYYY     |
| 3            | Index Trading Symbol        | Index Trading Symbol or Alpha code if Index Trading Symbol is unavailable        | Text         | 4              |
| 4            | Index Name                  | Index Name   | Text         | 255            |
| 5            | Index ISIN                  | Index ISIN   | Text         | 12             |
| 6            | Trading Symbol              | Constituent Trading Symbol   | Text         | 4              |
| 7            | Instrument                  | Constituent Name   | Text         | 255            |
| 8            | ISIN                        | Constituent ISIN   | Text         | 12             |
| 9            | Current Index<br>Membership | Constituent Index Membership   | Text         | 7              |
| 10           | Rank Turnover 12<br>Month   | Current month constituent ranking by 12-month turnover                           | Number       | 0              |
| 11           | Comment                     | Additional Comments or Empty ("Not traded on Xetra",<br>"30 Days Rule" or blank) | Text         | 255            |

## 2.11. Index Ranking

## 2.11.1. Selection indices - CSV format

The file may be generated in multiple versions accordingly to the Third Party Data license the clients is entitled to. The following table provides an overview of the different Components File name and the Third Party Data excluded.

- > File name:
  - Xxxxx\_rkP###.YYYYMMDD.csv, where YYYYMMDD is the ranking creation date
  - xxxxx\_rkP###.YYYYMMDD with P### = with P### = Permissioned Third Party data as described in section 1.2 of the DAX File Guide
- > File type: .csv
- > File specification: semicolon separated
- > File frequency: monthly (exact time depends on index methodology)

| Column<br>ID | Attribute               | Description  | Data Type | Data<br>Format |
|--------------|-------------------------|--|-----------|----------------|
| 1            | Date                    | Date at which the file is generated  | Date      | DD.MM.YYYY     |
| 2            | Cut-off Date            | Ranking list cut-off date  | Date      | DD.MM.YYYY     |
| ≺            | Index Trading<br>Symbol | Index Trading Symbol or Alpha code if Index Trading Symbol is<br>unavailable | Text      | 4              |
| 4            | Index Name              | Index Name   | Text      | 255            |
| 5            | Index ISIN              | Index ISIN   | Text      | 12             |

The comments are displayed in the following order taking into account if a security is a component or not of a selection index

Comment

Priority

| Other share type in selection index | 1 |
|-------------------------------------|---|
| Other share type is ranked          | 2 |
| Exclusion List                      | 3 |
| 30 days rule                        | 4 |
| No VWAP                             | 5 |
| blank                               | 6 |

In case the ranking is prepared for the DAX 50 ESG, only the following two comments are displayed:

| Comment                    | Order |
|----------------------------|-------|
| No ESG score available     | 1     |
| ESG criteria not fulfilled | 2     |

### 2.11.2. Scale 30 - CSV format

The file may be generated in multiple versions accordingly to the Third Party Data license the clients is entitled to. The following table provides an overview of the different Components File name and the Third Party Data excluded.

- > File name:
  - xxxxx\_rkP###.YYYYMMDD.csv, where YYYYMMDD is the ranking creation date
  - xxxxx\_rkP###.YYYYMMDD with P### = with P### = Permissioned Third Party data as described in section 1.2 of the DAX File Guide
- > File type: .csv
- > File specification: semicolon separated
- > File frequency: monthly (exact time depends on index methodology)

| Column<br>ID | Attribute                   | Description   | Data Type | Data<br>Format |
|--------------|-----------------------------|---|-----------|----------------|
| 1            | Date                        | Date at which the file is generated                                       | Date      | DD.MM.YYYY     |

| 17           | WEIGHT_FINAL               | Indicative weight in the future index composition (final)  | Number    | 9              |

## 2.12. Statistical reporting

## 2.12.1. Analytical data report

This report contains both index and constituent statistical measures and performance indicators. The file is available on MD+S Interactive platform for licensed users.

> File name:

#### xxxxx\_BMA.YYYYMMDD.xls

- > File type: .xls
- > File frequency: daily at COB

The report consists of four tabs:

- 1. Cover displays file and index name, report date and Customer Support contact details
- 2. Data for today index and constituent closing data
- 3. Data for next day index and constituent data adjusted for the next dissemination day
- 4. Info Displays Customer Support contact details and a legend of measures used in calculation

The file specifications will cover tabs "Data for today" and "Data for next day".

Data starts at **Row 6.**

## 2.12.3. ESG Reporting

ī.

The aim of the file is to provide the consolidated ESG data for DAX ESG/Climate indices in order to meet regulatory requirements. All calculated measures are based on closing data of quarterly review effective date. The file is publicly available on DAX Website.

- > File Name: ESG\_Report\_IndexISIN
- > File Type: .csv
- > File specification: semicolon separated
- > File Frequency: Quarterly (after review implementation)

## 3. Bond Index Files

## 3.1. eb.rexx Bond Indices

## **3.1.1.Future Constituent List**

This report displays future index composition and underlying data that will be implemented at the next chaining date. The file is available on MD+S Interactive platform for licensed users.

#### 3.1.1.1. XLS format

- > File name: ebrexx \_BCR.YYYYMMDD.xls, where YYYYMMDD is review effective date
- > File type: .xls
- > File frequency: monthly

The report consists of five tabs:

- 1. Cover displays file and index name, report date and Customer Support contact details
- 2. Index navigation page to switch between tabs
- 3. Constituents index and constituent future composition data
- 4. Insertions additions to the eb.rexx indices at the review effective date
- 5. **Deletions –** deletions from the eb.rexx indices at the review effective date

The file specifications will cover tabs "Data for today" and "Data for next day".

#### Sheet "Constituents"

Data starts at Row 6.

| Column<br>ID | Attribute                         | Description                                | Data Type | Data<br>Format |
|--------------|-----------------------------------|--|-----------|----------------|

## 3.1.2.Bond Weightings Premium

This report contains both index and constituent information based on market closing values as well as index and constituent adjustments to be effective the next index dissemination day. It also includes various statistical measures. The file is available on MD+S Interactive platform for licensed users.

#### 3.1.2.1. XLS format

- > File name:
  - ebrexx\_1300\_BWP.YYYYMMDD.xls ebrexx\_eod\_BWP. YYYYMMDD.xls
- > File type: xls
- > File frequency: daily at COB

The report consists of four tabs:

- 1. Cover displays file and index name, report date and Customer Support contact details
- 2. Index navigation page to switch between tabs
- 3. Index Values index closing data
- 4. **Underlyings –** index constituent closing data

#### Sheet "Index Values"

Data starts at Row 13.

| Column<br>ID | Attribute                         | Description  | Data Type | Data<br>Format |
|--------------|-----------------------------------|--|-----------|----------------|

## 3.4. REX indices

- > File name: rex\_BKF.YYYYMMDD
- > File type: .xls
- > File frequency: daily

The report consists of five tabs:

- 1. Cover displays file and index name, report date and Customer Support contact details
- 2. **Index** navigation page to switch between tabs
- 3. **REX Indices** REX® index as well as its respective sub-indices
- 4. Regression Coefficients
- 5. Weighting Matrix

#### Sheet "REX Indices"

#### Table format:

| Column<br>ID | Attribute          | Description                                    | Data<br>Type | Data<br>Format |
|--------------|--------------------|--|--------------|----------------|
| 1            | Index              | REX® index and its respective sub-indices      | Text         | 255            |
| 2            | Total Return Index | Numeric value of index or respective sub-index | Number       | next table     |
| 3            | Price Index        | Numeric value of index or respective sub-index | Number       | next table     |
| 4            | Yield              | Numeric value of index or respective sub-index | Number       | next table     |
| 5            | Duration           | Numeric value of index or respective sub-index | Number       | next table     |
| 6            | Modified Duration  | Numeric value of index or respective sub-index | Number       | next table     |

## 4. Strategy Index Files

## 4.1. Short / Leveraged Indices

The IWB report for short / leveraged indices displays index closing values and measures used in calculation. Each report has a slightly different format based on calculation formula. Each file will be described separately in the following section.

- > File type: xls
- > File frequency: daily at COB

The report consists of four tabs:

- 1. **Cover** displays file and index name, report date and Customer Support contact details
- 2. Index navigation page to switch between tabs
- 3. Data sheet index closing data
- 4. Legend legend of measures used in calculation

The file specifications will cover tab "Data sheet".

### 4.1.1.DAX daily leveraged

> File name: LevDAX\_IWB.YYYYMMDD

#### Table format:

| Column<br>ID | Attribute    | Description                  | Data<br>Type | Data<br>Format |
|--------------|--------------|------------------------------|--------------|----------------|
| 1            | Day Calendar | Date                         | Date         | dd-mm-<br>yyyy |
| 2            | Constituent  | Description of constituent   | Text         | 30             |
| 3            | Abbreviation | Abbreviation of constituent  | Text         | 12             |
| 4            | Value        | Numeric value of constituent | Number       | next table     |

#### Data format:

| Row ID | Description  | Value<br>rounding |
|--------|--|-------------------|
| 11     | DAX Kurs Index value on previous date              | 2                 |
| 12     | DAX Performance Index value on previous date       | 2                 |
| 13     | ESTER value on previous date                       | 3                 |
| 14     | DAX Kurs Index value on report date                | 2                 |
| 15     | DAX Performance Index value on report date         | 2                 |
| 16     | ESTER value on report date                         | 3                 |
| 17     | Liquidity spread on report date                    | 5                 |
| 18     | Number of days between rebalancing and report date | 0                 |
| 19     | Liquidity spread for the next calculation date     | 5                 |

| 20 | Empty  | N/A |
|----|--|-----|
| 21 | Empty  | N/A |
| 22 | Closing values of indices in the family (on previous date and report date) | 2   |

## 4.1.2.DAX Monthly Leveraged

> File name: LevDAXMonthly\_IWB.YYYYMMDD

#### Table format:

| Column<br>ID | Attribute    | Description                  | Data<br>Type | Data<br>Format |
|--------------|--------------|------------------------------|--------------|----------------|
| 1            | Day Calendar | Date                         | Date         | dd-mm-<br>yyyy |
| 2            | Constituent  | Description of constituent   | Text         | 30             |
| 3            | Abbreviation | Abbreviation of constituent  | Text         | 12             |
| 4            | Value        | Numeric value of constituent | Number       | next table     |

#### Data format:

| Row ID | Description   | Value<br>rounding |
|--------|---|-------------------|
| 11     | DAX Performance Index value on rebalancing date                               | 2                 |
| 12     | EURIBOR value on rebalancing date   | 3                 |
| 13     | DAX Performance Index value on report date                                    | 2                 |
| 14     | EURIBOR value on report date date   | 3                 |
| 15     | Number of days between rebalancing and report date                            | 0                 |
| 16     | Effective daily leverage for the next calculation date                        | 9                 |
| 17     | Empty   | N/A               |
| 18     | Empty   | N/A               |
| 19     | Closing values of indices in the family (on rebalancing date and report date) | 2                 |

## 4.1.3.DAX Short

> File name: ShortDAX\_IWB.YYYYMMDD

#### Table format:

| Column<br>ID | Attribute    | Description                  | Data Type | Data<br>Format |
|--------------|--------------|------------------------------|-----------|----------------|
| 1            | Day Calendar | Date                         | Date      | dd-mm-yyyy     |
| 2            | Constituent  | Description of constituent   | Text      | 32             |
| 3            | Abbreviation | Abbreviation of constituent  | Text      | 14             |
| 4            | Value        | Numeric value of constituent | Number    | next table     |

#### Data format:

| Row ID | Description                           | Value<br>rounding |
|--------|---------------------------------------|-------------------|
| 11     | DAX Kurs Index value on previous date | 2                 |

| 12 | DAX Performance Index value on previous date                               | 2   |
|----|--|-----|
| 13 | ESTER value on previous date   | 3   |
| 14 | Cost to borrow (Kurs index) on report date                                 | 7   |
| 15 | Cost to borrow (Performance index) on report date                          | 7   |
| 16 | DAX Kurs Index value on report date  | 2   |
| 17 | DAX Performance Index value on report date                                 | 2   |
| 18 | ESTER value on report date   | 3   |
| 19 | Number of days between rebalancing and report date                         | 0   |
| 20 | Cost to borrow (Kurs index) for next calculation date                      | 7   |
| 21 | Cost to borrow (Performance index) for next calculation date               | 7   |
| 22 | Empty  | N/A |
| 23 | Empty  | N/A |
| 24 | Closing values of indices in the family (on previous date and report date) | 2   |

## 4.1.4.DAX Monthly Short

> File name: ShortDAXMonthly\_IWB. YYYYMMDD

#### Table format:

| Column<br>ID | Attribute    | Description                  | Data<br>Type | Data<br>Format |
|--------------|--------------|------------------------------|--------------|----------------|
| 1            | Day Calendar | Date                         | Date         | dd-mm-<br>yyyy |
| 2            | Constituent  | Description of constituent   | Text         | 30             |
| 3            | Abbreviation | Abbreviation of constituent  | Text         | 12             |

| 23     | Empty  | N/A               |
| 24     | Closing values of indices in the family (on previous date and report date) | 2                 |

## 4.2. idDAX Leveraged/Short NC Indices

## 4.2.1.Leveraged NC

The closing data for idDAX Leveraged / Short NC indices is displayed in two files for current day and next dissemination day.

> File name:

idDAX#xLevNCTREUR\_IWB\_TD.YYYYMMDD.csv – current day idDAX#xLevNCTREUR\_IWB\_ND.YYYYMMDD.csv – next dissemination day

- where **#** is the leverage factor (2 to 15)
- > File type: .csv
- > File specification: semicolon separated
- > File frequency: daily at COB

| Column | Attribute         | Description                    | Data   | Data       |
|--------|-------------------|--------------------------------|--------|------------|
| ID     |                   |                                | Туре   | Format     |
| 1      | Date              | Report date                    | Date   | dd.mm.yyyy |
| 2      | Index Close Value | Index closing value            | Number | 2          |
| 3      | Underlying Index  | Underlying index closing value | Number | 2          |
| 4      | DF                | Dividend factor                | Number | 6          |
| 5      | VDAX-NEW          | VDAX closing value             | Number | 13         |

| 6  | VDAX-NEW_1m_avg        | VDAX 1-month average value   | Number | 13 |

| 15 | EURIBOR (12M)_T-3      | 12-month EURIBOR rate on the 3 <sup>rd</sup> day before rebalancing  | Number | 3  |
| 16 | 1Y ESTER Swap Rate_T-3 | 1-year EONIA swap rate on the 3 <sup>rd</sup> day before rebalancing | Number | 4  |
| 17 | EURIBOR (12M)_T-4      | 12-month EURIBOR rate on the 4 <sup>th</sup> day before rebalancing  | Number | 3  |
| 18 | 1Y ESTER Swap Rate_T-4 | 1-year EONIA swap rate on the 4 <sup>th</sup> day before rebalancing | Number | 4  |
| 19 | EURIBOR (12M)_T-5      | 12-month EURIBOR rate on the 5 <sup>th</sup> day before rebalancing  | Number | 3  |
| 20 | 1Y ESTER Swap Rate_T-5 | 1-year EONIA swap rate on the 5 <sup>th</sup> day before rebalancing | Number | 4  |

## 4.2.2.Short NC

> File name:

idDAX#xShortNCTREUR\_IWB\_TD.YYYYMMDD.csv – current day idDAX#xShortNCTREUR\_IWB\_ND.YYYYMMDD.csv – next dissemination day

where **#** is the short factor (2 to 15)

- > File type: .csv
- > File specification: semicolon separated
- > File frequency: daily at COB

| Column | Attribute         | Description                    | Data   | Data       |
|--------|-------------------|--------------------------------|--------|------------|
| ID     |                   |                                | Туре   | Format     |
| 1      | Date              | Report date                    | Date   | dd.mm.yyyy |
| 2      | Index Close Value | Index closing value            | Number | 2          |
| 3      | Underlying Index  | Underlying index closing value | Number | 2          |
| 4      | VDAX-NEW          | VDAX closing value             | Number | 4          |
| 5      | VDAX-NEW_1m_avg   | VDAX 1-month average value     | Number | 13         |
| 6      | VDAX-NEW_6m_avg   | VDAX 6-month average value     | Number | 13         |
| 7      | GF                | Gap Risk Factor                | Number | 10         |
| 8      | Interest Rate     | Interest rate                  | Number | 3          |
| 9      | СТВ               | Cost to borrow                 | Number | 7          |

## 4.3. Hedged

The report for hedged indices (daily and monthly) displays hedged and underlying index values.

> File name:

DAX\_PR\_CUR\_HEDGED\_IV.YYYYMMDD.csv DAX\_TR\_CUR\_HEDGED\_IV.YYYYMMDD.csv DAX\_NR\_CUR\_HEDGED\_IV.YYYYMMDD.csv

where CUR refers to the hedging currency, and PR, NR and TR stand for price, net and total return versions respectively

- > File type: .csv
- > File specification: semicolon separated
- > File frequency: daily at COB

| Column<br>ID | Attribute                               | Description  | Data<br>Type | Data<br>Format |
|--------------|---|--|--------------|----------------|
| 1            | Date                                    | Report date  | Date         | yyyy-mm-dd     |
| 2            | DAX PR⁴_CUR                             | DAX index closing value for the selected return version / currency | Number       | 2              |
| 1 3          | DAX DAILY <sup>5</sup> HEDGED<br>PR CUR | DAX daily hedged index value                                       | Number       | 2              |
| 4            | Hedge Return                            | Index Hedge Return   | Number       | 10             |

## 4.4. Risk Control

There are two reports produced for the DAX Risk Control Indices – IV format, which contains index closing values, and IWB format, which includes underlying data such as interest date and underlying index values.

## 4.4.1.Index Values

#### 4.4.1.1. Total Return

> File name:

DAXRiskControlRVTR\_IV.YYYMMDD.csv

- > File type: .csv
- > File specification: semicolon separated
- > File frequency: daily at COB

| Column<br>ID | Attribute    | Description  | Data<br>Type | Data<br>Format |
|--------------|--------------|--|--------------|----------------|
| 1            | Date         | Report date  | Date         | dd.mm.yyyy     |
| 2            | DE000A0Z3LC2 | DAX Risk Control 5% RV (Gross Return) EUR closing value  | Number       | 5              |
| 3            | DE000A0Z3LG3 | DAX Risk Control 10% RV (Gross Return) EUR closing value | Number       | 5              |
| 4            | DE000A0Z3MC0 | DAX Risk Control 12% RV (Total Return) EUR closing value | Number       | 5              |
| 5            | DE000A0Z3LJ7 | DAX Risk Control 15% RV (Gross Return) EUR closing value | Number       | 5              |
| 6            | DE000A0Z3LL3 | DAX Risk Control 20% RV (Gross Return) EUR closing value | Number       | 5              |

#### 4.4.1.2. Excess Return

> File name:

DAXRiskControlRVER\_IV.YYYMMDD.csv

- > File type: .csv
- > File specification: semicolon separated

 $<sup>^4</sup>$  «PR», «NR» or «TR» based on the selected index version

<sup>&</sup>lt;sup>5</sup> "DAILY" or "MONTHLY"

#### File frequency: daily at COB >

| Column<br>ID | Attribute    | Description   | Data<br>Type | Data<br>Format |
|--------------|--------------|---|--------------|----------------|
| 1            | Date         | Report date   | Date         | dd.mm.yyyy     |
| 2            | DE000A0Z3LB4 | DAX Risk Control 5% RV (Excess Return) EUR closing value  | Number       | 5              |
| 3            | DE000A0Z3LF5 | DAX Risk Control 10% RV (Excess Return) EUR closing value | Number       | 5              |
| 4            | DE000A0Z3MB2 | DAX Risk Control 12% RV (Excess Return) EUR closing value | Number       | 5              |
| 5            | DE000A0Z3LH1 | DAX Risk Control 15% RV (Excess Return) EUR closing value | Number       | 5              |
| 6            | DE000A0Z3LK5 | DAX Risk Control 20% RV (Excess Return) EUR closing value | Number       | 5              |

## 4.4.2. Underlying values

#### 4.4.2.1. Total Return

File name: >

DAXRiskControlRVTR\_IWB.YYYYMMDD.csv

- File type: .csv >

FILES GUIDE

# 

## 5. Changes to the Files Guide

May 2020: Publication of the DAX Files Guide – all existing files specifications regrouped in a single guide.

**November 2020**: Addition of chapters 2.3.3. DAX Dividend Point Indices, 3. Bond Index Files, 4. Strategy Index Files.

**January 2021**: Addition of subchapters 2.12.1. Analytical Data report, 2.12.2. Roundtrip csv and 2.12.3. ESG Reporting.

March 2021: Changes of files name, sections 2.10.1 and 2.10.2.

July 2021: Update of attributes and descriptions for 2.12.3 ESG Reporting.

July 2021: Update of filename and descriptions for 2.12.3 ESG Reporting.

August 2021: Clarification description column 20 for 2.11.1 Selection indices - CSV format.

**September 2021:** All decommissioned file structures were moved to Dax Decommissioned Files Guide. Clarification of the 2.12.2 Roundtrip CSV.

**October 2021:** Addition attribute Share\_of\_Benchmark\_in\_Investable\_Universe\_Free\_Float\_Market\_Capitalization 2.12.3 ESG Reporting.

October 2021: Naming updates due to EONIA transition and Risk-Free-Rate transition.
