

ISTOXX® EUROPE QUALITY INCOME UH INDEX

Stated objective

The iSTOXX Europe Quality Income UH Index aims to capture the performance of shares that offer attractive and sustainable dividend yields.

The index is a fundamental driven concept to obtain sustainable dividend yields through a sophisticated screening and calculation algorithm. It selects companies that may offer lower risk and higher quality by including a large number of fundamental ratios.

Key facts

» The quality income strategy is based on two principles. The first is that historically, dividend yield has been the dominant component of equity returns. The second is that equity investors are not rewarded for buying higher risk stocks. The index aims to identify a universe of assets that may offer lower risk and higher quality. A set of measures aims to reduce the overall volatility, beta and drawdown of the portfolio and also reduces the probability of dividend cuts. None of the quality measures incorporate any forecasts and are solely based on reported information.

Descriptive statistics

Index	Market cap (EUR bn.)		Components (EUR bn.)				Component weight (%)		Turnover (%)
	Full	Free-float	Mean	Median	Largest	Smallest	Largest	Smallest	Last 12 months

Performance and annual returns³

Methodology

The index universe is the STOXX® Europe 600 ex Financials Index.

Components are selected based on the following criteria:

- » Quality score: is a set of measures based on fundamental ratios, such as return on assets, cash flow from operations, leverage etc.
- » Balance sheet risk score: measures the credit quality of a company
- » Expected dividend yield
- » Liquidity: measured by the average daily traded volume and free-float market cap of a component.

The detailed methodology including the calculation formula can be found in our rulebook: <http://www.stoxx.com/indices/rulebooks.html>
