STRATEGY INDICES

STOXX® CHINA A 900 MINIMUM VARIANCE UNCONSTRAINED AM INDEX

Index description

The STOXX China A 900 Minimum Variance Unconstrained AM (Accessible Market) Index represents a portfolio of the China A shares, which are accessible to foreign investors through the Northbound Trading segments of the Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connect programs. The index universe is the STOXX China A 900 Minimum Variance Unconstrained Index.

The STOXX® Minimum Variance Indices seek to minimize risk by reducing the volatility in a portfolio. STOXX offers two versions of STOXX® Minimum Variance Indices: constrained and unconstrained. The unconstrained version provides a strategy which gives the investors the freedom to implement a pure minimum variance strategy with improved volatility rather than following the parent benchmark.

Key facts

- » Minimized volatility is suitable for risk-averse investors.
- » Suitable as a liquid underlying for ETFs and structured products. It is easy to replicate as it has fewer components than the underlying index. It also has fixed rebalancing dates as well as turnover and liquidity constraints.
- » Filter applied to ensure that only China A shares available to foreign investors are part of the index.
- » Capping constraints are applied in accordance with the Undertakings for Collective Investment in Transferable Securities (UCITS) directive to ensure that funds can easily track the index.
- » The Unconstrained version offers a first-of-its-kind index for a true minimum variance mandate.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.
