STOXX® GLOBAL 3D PRINTING PURE PLAY INDEX

Index description

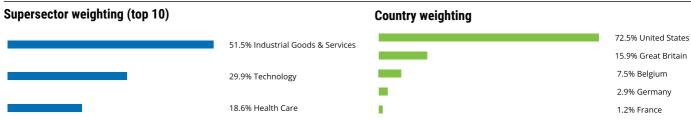

The STOXX Global 3D Printing Pure Play Index is designed to give a diversified representation of companies in this emerging and booming technology. 3D printing is the process of making virtually any shape from a digital model. As an additive manufacturing technology, it has wide applications across many industries, including aerospace, health and biotech, education and manufacturing.

Key facts

- » One of the first indices to represent this relatively new technology on a global scale
- » Diversified with regard to geography and sector
- » More than 70% of the index consists of companies that derive 100% of their revenue from 3D printing.

STOXX Global 200 Index	17.5	16.0	17.2	15.9	0.1	1.5	2.6	14.3

Performance and annual returns4

Methodology

For the Pure Play Index, a company must generate more than 10% of its revenue from the 3D Printing sector, have a minimum three-month average daily trading volume (3-month ADTV) of 25,000 euros and a minimum free-float market cap of 10 million euros. All companies that meet these requirements are ranked by free-float market cap. The top 30 companies will be selected for inclusion in the index. The detailed methodology including the calculation formula can be found in our rulebook: www.stoxx.com/indices/rulebooks.html

DISCLAIMER

STOXX, Deutsche Börse Group and their licensors, research partners or data providers do not make any warranties or representations, express or implied, with respect to the timeliness, sequence, accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data and exclude any liability in connection therewith. STOXX, Deutsche Börse Group and their licensors, research partners or data providers are not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX, Deutsche Börse Group or their licensors, research partners or data providers on the merits of that company. Financial instruments based on the STOXX® indices, DAX® indices or on any other indices supported by STOXX are in no way sponsored, endorsed, sold or promoted by STOXX, Deutsche Börse Group or their licensors, research partners or data providers.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interrupted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers a wide range of customization, in terms of component selection, weighting schemes and personalized calculation methodologies.

³ gr. div. yield is calculated as gr. return index return minus price index return
