

# ISTOXX MUTB CHINA ALL SHARES AM QUALITY CONSUMER 50

## Index description

The iSTOXX MUTB China All Shares AM Quality Consumer 50 Index aims to capture the performance of quality consumer companies with high profitability, low leverage and sustainable cash flows in China. The component selection is based on a combined ranking of four fundamentals ratios (return on equity, debt-to-capital, cash flow generation ability and business stability). Stocks need to fulfill minimum liquidity criteria before being added to the index.

## Key facts

- »Pure quality play focusing on consumer Segment
- »Ideal for market participants seeking exposure to the Chinese market while investing in quality stocks with sustainable profitability
- »Diversification through capping of component weights at 5%

## Methodology

The parent universe of the ISTOXX MUTB China All Shares AM Quality Consumer 50 Index is consumer goods and services companies within the ISTOXX China All Shares AM Index. The component selection is based on a combined ranking of four fundamentals ratios (return on equity, debt-to-capital, cash flow generation ability and business stability). Stocks need to fulfill minimum liquidity criteria before being added to the index. The constituents are weighted according to free-float market capitalization with a cap at 5%. The indices are reviewed semi-annually in June and December and rebalanced quarterly. The detailed methodology including the calculation formula can be found in our rulebooks:

## BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

## ISTOXX INDICES

3

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

<sup>3</sup> Net dividend yield is calculated as net return index return minus price index return
