THEME INDICES

STOXX EUROPE LUXURY 10

Index description

The STOXX Europe Luxury 10 index aims to select 10 companies that are positively exposed to European luxury goods. This includes companies involved in luxury/fashion accessories, cosmetics/other care products and high-class vehicles. These businesses are expected to benefit from the demand for luxury goods.

FactSet Revere (RBICS) data allow for a detailed breakdown of revenue sources of eligible companies, helping the index methodology select those with substantial exposure to the targeted theme.

Key facts

»Index allows targeted investment in the European luxury industry.

»FactSet Revere data allows detailed and accurate revenue breakdown of eligible companies.

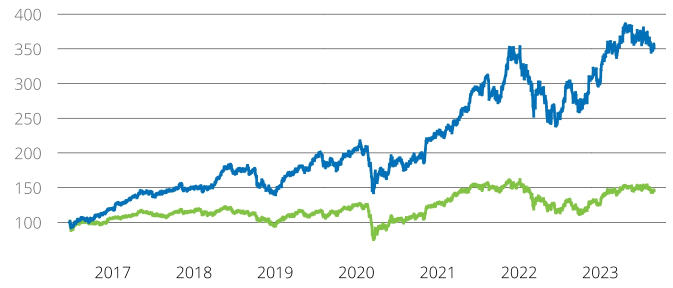
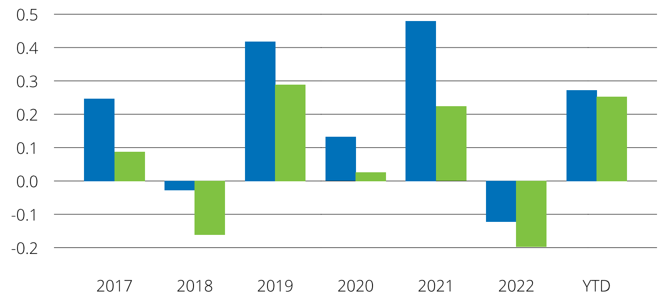
Performance and annual returns[4]





Methodology

The parent index of the STOXX Europe Luxury 10 Index is the STOXX Europe Total Market Index. The index applies liquidity, volatility, size and ICB subsectors screens. Furthermore, companies belonging to a defined set of countries and subsectors that derive more than 50% of their most recent total annual revenue from sectors linked to the luxury trend are highlighted as potential index components. It is a free-float market cap weighted index considering a luxury multiplier with a 20% cap per constituent. The index is reviewed annually in June.

The detailed methodology including the calculation formula can be found in our rulebooks: www.stoxx.com/rulebooks

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

[3] Net dividend yield is calculated as net return index return minus price index return
