

STOXX GLOBAL SMART CITY INFRASTRUCTURE

Index description

The STOXX Global Smart City Infrastructure Index tracks the performance of companies deploying the physical structures and facilities needed as urban development becomes more intelligent and efficiency-focused. As such, the index targets two global thematic trends: that of smart cities and of infrastructure. As cities in the digital era are faced with expanding populations, limited natural resources, rapidly changing technology and the need to protect the environment, new facilities are required to address challenges and exploit innovative means of transport, housing, energy, waste management and communications.

STOXX uses FactSet's Revere (RBICS) granular data for a detailed breakdown of the revenue sources of the eligible companies, to select those most exposed to the smart city infrastructure theme. Nearly 50 sectors have been associated to the theme and include cellular site equipment, metal recycling providers, multi-type passenger transportation and water treatment agents manufacturing.

The index is also taking ESG considerations into account. Companies that are non-compliant with the Global Standards Screening (GSS) or are involved in Controversial Weapons activities, or display a Severe (Category 5) Controversy Rating, as identified by Sustainalytics, are excluded. Additional

Key facts

»Index allows targeted investment in sustainable smart city infrastructure - a long-term structural trend.

»Detailed Revere data helps select companies with a revenue exposure of more than 50% to related sectors.

»Leveraging sustainability data from leading provider (Sustainalytics) to avoid exposure to companies engaged in controversial activities.

»Size and liquidity filters ensure replicability.

Descriptive statistics

Index	Market cap (USD bn.)		Components (USD bn.)				Component weight (%)		Turnover (%)

Performance and annual returns⁴

Methodology

Companies from the STOXX Global Total Market Index that derive more than 50% of their most recent total annual revenue from sectors linked to the smart city infrastructure trend are highlighted as potential index components. The index excludes companies that are not compliant with the Sustainalytics Global Standards Screening assessment, are involved in Controversial Weapons, Small Arms, Military Contracting, Tobacco, Thermal Coal, and Oil & Gas. Moreover, companies that display high ESG Controversy Ratings or are involved in severe controversies are also excluded.

The index applies liquidity and size screens and aims to have a minimum number of 80 components. It is weighted by adjusted equal weights and reviewed annually. The detailed methodology including the calculation formula can be found in our rulebooks: www.stoxx.com/rulebooks

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

³ gr. div. yield is calculated as gr. return index return minus price index return
