ENVIRONMENTAL SOCIAL

STOXX GLOBAL ESG GOVERNANCE LEADERS

Index description

The STOXX Global ESG Governance Leaders indices consist of one broad and three specialized indices for the areas of environmental, social and governance. The three specialized indices form the broad STOXX Global ESG Leaders Index.

The indices provide access to global sustainability leaders through quantitative selection. The sustainability data in environmental, social and governance areas are provided by Sustainalytics. The indices follow a bottom-up approach and are based on companies' ESG scores.

Key facts

»Scoring methodology looks at each company individually and makes clear differentiations between different types of companies.

»Specialized indices - STOXX Global ESG Environmental Leaders, Social Leaders and Governance Leaders - are also available separately and may be combined in all variations.

»Methodology allows a detailed attribution of sustainability performance for index components and non-components.

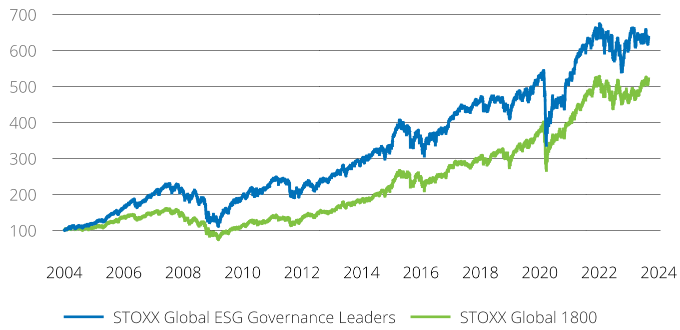
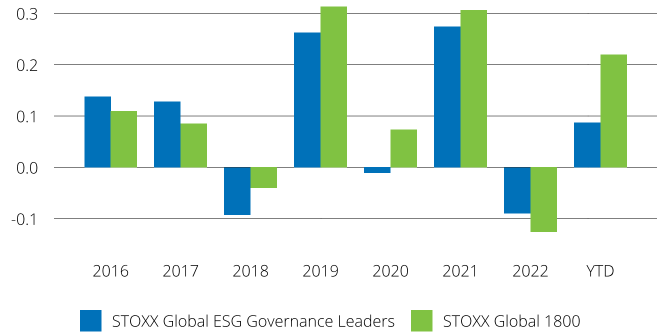
STOXX Global 1800	20.8	17.7	18.7	17.4	0.1	2.3	1.9	10.8

Performance and annual returns[4]





Methodology

The universe consists of all stocks in the STOXX Global 1800 Index. Companies that do not comply based on Sustainalytics Global Standards Screening assessment, ESG Controversies, ESG Risk Ratings, or are involved in Controversial Weapons, Tobacco, Thermal Coal, Unconventional Oil & Gas, Military Contracting, or Small Arms are excluded. Companies passing the initial selection criteria are ranked by STOXX according to a transparent evaluation system provided by Sustainalytics. The system ranges from 0 to 100 points and is applied for each category: environmental, social and governance. To be included in one of the specialized indices, e.g. the STOXX Global ESG Social Leaders Index, companies must score in the top quartile (25th percentile) in that category and get an above average score (50th percentile) in the other two (governance, environmental). Index components are weighted according to their ESG scores.

The detailed methodology including exclusion criteria and the calculation formula can be found in the ESG rulebook: www.stoxx.com/indices/rulebooks.html

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

[3] gr. div. yield is calculated as gr. return index return minus price index return
