Item 1. Name of the benchmark administrator.	STOXX Ltd.	
Item 2. Type of benchmark.	Equity	
Item 3. Name of the benchmark.	Benchmark – iSTOXX APG World Multi-Factor Responsible Low-Carbon SDI Index Family - STOXX Environmental Social & Governance Family	
Item 4. Does the methodology take into account ESG factors?	Yes	
Item 5. ESG factors taken into a	account for benchmark family.	
(a) List of environmental factors considered	This benchmark family takes the following environmental factors into account by exclusion Global Standards Screening; Controversy Ratings; Environmental Ratings, Overall ESG Ratings; Unconventional Oil & Gas; Conventional Oil & Gas; Thermal Coal; Genetically Modified Plants & Seeds; Pesticides; Palm Oil; Power Generation from Fossil Fuels; Subsectorial Classification.	
	This benchmark family takes the following environmental factors into account by selection: Environmental Ratings, Overall ESG Ratings.	
	This benchmark family takes the following environmental factors into account by weighting Environmental Ratings, Overall ESG Ratings; EU Climate Transition Benchmark (EU CTB requirements; EU Paris Aligned Benchmark (EU PAB) requirements.	
(b) List of social factors considered	This benchmark family takes the following social factors into account by exclusion: Global Standards Screening; Controversy Rating; Social Rating, Overall ESG Rating; Controversial Weapons; Weapons (Small Arms & Military Contracting); Nuclear Power; Tobacco; Adult Entertainment; Alcoholic Beverages; Fur & Speciality Leather; Gambling; Abortion; Contraceptives; Human Embryonic Stem Cells; Genetically Modified Plants & Seeds; Predatory Lending; Subsectorial Classification.	
	This benchmark family takes the following social factors into account by selection: Social Rating; Overall ESG Rating.	
	This benchmark family takes the following social factors into account by weighting: Social Rating; Overall ESG Rating.	
(c) List of governance factors considered.	This benchmark family takes the following governance factors into account by exclusion: Global Standards Screening; Governance Rating; Overall ESG Rating.	
	This benchmark family takes the following governance factors into account by selection: Governance Rating; Overall ESG Rating.	
	This benchmark family takes the following governance factors into account by weighting: Governance Rating; Overall ESG Rating.

considered.	APG Exclusion Flag: a data attribute designed to identify companies that are excluded from the investment universe for product-based reasons (e.g., controversial weapons, ta sands, thermal coal, and tobacco), or conduct-based reasons, or because companies had a high risk of or proven to be violating one or more of the ten UNGC Principles. Tar sand and thermal coal exclusions are included starting from 1st June 2021. Conduct-based exclusions are included starting from 1st December 2021. APG ESG-Leader Flag: a data attribute designed to identify companies that are consider to be adequately managing ESG risks. Under this policy, companies are systematically assessed based on their conduct in relation to the management of ESG-related risks inherent in companies' industries and markets. The assessment contains both normative and relative components and focuses on companies' preparedness and behavior regard business ethics, human rights, labor standards and the environment. APG Carbon Footprint Equity Measure: a data attribute that reflects the total absolute emissions of attributable to the equity capital of a company. APG SDI Measure: a data attribute designed to screen for companies that actively contribute to the UN Sustainable Development Goals through the products and services that they make. The underlying methodology uses the standard and taxonomy of the SD Asset Owner Platform and the Al-based technology from ENTIS to systematically identific companies that contribute to the UN SDGs. APG Sustainability Risk Score: a data attribute on an environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment. The underlying methodology uses a public SASB materiality map that forms a basis for APG AM ESG Risk Taxonomy to identify the	
	financially material issues that are likely to impact the financial performance of an entity and hence has been applied as a baidentification. A Sustainability Risk Score uses MSCI ESG KessASB framework to identify and manage ESG risks. APG Climate Measure: a data attribute designed to identify less than the surrous and the identify less than the identification and the identification are identification.	asis for the (financial) risk ey Issue scores aligned with
