Description of factors considered.	<p>UNGC Violations: Sustainalytics' Global Standards Screening provides an assessment of a company's impact on stakeholders and the extent to which a company causes, contributes or is linked to violations of international norms and standards (UNGC, OECD, UNGPs and their underlying conventions).</p> <p>Controversial Weapons: Sustainalytics' Controversial Weapons Radar monitors company involvement in the following areas: anti-personnel mines, biological and chemical weapons, cluster weapons, depleted uranium, nuclear weapons and white phosphorus weapons.</p> <p>GHG Emission Intensity: Scope 1 and Scope 2 emission intensity sourced from ISS ESG. ISS ESG collects all publicly available self-reported greenhouse gas emissions data. In instances of non-reporting, emissions are estimated by ISS ESG using their climate emissions model based on the sector and subsector the company belongs to.</p>	

	<p>Controversy Rating: Sustainalytics assesses companies' involvement in incidents with negative environmental, social and governance (ESG) implications. Controversy involvement is one key measure of ESG performance. A controversy is defined as an event or aggregation of events relating to an ESG topic. An event is assessed on its severity on a scale of 1 to 5 (1- Low, 2- Moderate, 3- Significant, 4- High, 5- Severe).</p> <p>ESG Risk Ratings: The ESG Risk Rating evaluates the degree of a company's unmanaged material ESG risk by assessing a company's exposure to, and management of, the ESG issues that are considered most material for that company from a financial perspective. Sustainalytics assess and categorizes companies into five risk categories (Negligible, Low, Medium, High, Severe).</p> <p>Product Involvement: Sustainalytics' Product Involvement Research identifies companies' involvement on a range of product involvement categories.</p> <p>Overall ESG Rating: Sustainalytics' ESG Ratings measure how well issuers proactively manage the environmental, social and governance issues that are the most material to their business.</p> <p>More detailed information on the application of these categories is available within the relevant methodology guides. https://www.stoxx.com/rulebooks</p>
