

Zug, June 12th, 2026

Migration - ECPI Equity Indices to be calculated by STOXX effective December 21st, 2026

Dear Customer,

STOXX Ltd., the operator of the ISS STOXX index business and a global provider of innovative and tradable index concepts, today announces that the ECPI Equity, Hedged, Risk Control, and Decrement indices will be calculated by STOXX, effective Monday, December 21st, 2026.

The ECPI Equity, Hedged, Risk Control, and Decrement index values currently calculated by the Calculation Agent (S&P Dow Jones Indices) will remain valid until the last index value calculation dated Friday, December 18th, 2026. **As of Monday, December 21st, 2026, at the close of the market, the ECPI Equity, Hedged, Risk Control, and Decrement indices will be calculated by STOXX, and End-of-Day values will be distributed via Deutsche Börse Consolidated Exchange Feed (CEF).**

As part of this migration, STOXX will implement updates to the index calculation methodology, as well as changes to file names and file formats for ECPI Equity, Hedged, Risk Control, and Decrement indices. These changes aim to enhance the transparency, consistency, and usability of the index data. Additional information related to the file name and format changes is available in the following communications, dated June 12th, 2026 "ECPI Equity Index Reports - New file name and format change effective December 21, 2026".

Please note that further Announcements are scheduled regarding New ECPI Hedged Index Reports ECPI Risk Control Index Reports.

The updated index methodologies will introduce enhancements to the index calculation process, review procedures, and corporate action adjustments. Full details of these methodologies will be published at the end of August 2026 (ECPI Equity Indices – Batch 1) and at the end of September 2026 (ECPI Equity Indices – Batch 2). The corresponding notifications will be published on those dates.

ECPI clients and Data Vendors are required to update their internal systems to ensure respectively the continuity of Index Data integration and Index values dissemination.

This Announcement contains the following information:

- **Overview of ECPI Indices Migration to STOXX**
 - Preparation phase
 - Parallel Run phase
 - Go Live phase
- **Overview of the Calculation and Dissemination of ECPI Equity Indices by STOXX**
 - New ECPI Index Calculation & Methodologies
 - ECPI Index values dissemination & ECPI Index Data reports
- **Overview of the Parallel Run Phase & Simulation Phase**
 - Parallel Run for ECPI Index Calculation
 - Dissemination of ECPI Index Values on CEF Simulation environment
 - Index Reports available in Simulation web page and Simulation SFTP folder
- **Overview of the Go Live Phase**
- **Overview of Index Data Distribution System**
 - iSFTP Access
 - Web Access
- **Overview of the new set of ECPI Index Data**
 - Naming convention
 - File format change - ECPI Equity Indices
 - File format change - ECPI Decrement Indices
 - File format change - ECPI Risk Control Indices
 - File format change - ECPI Hedged Indices
- **Appendix: List of affected ECPI Indices**

For the convenience of our clients, STOXX provides hereafter a definition of the terms used in this Announcement.

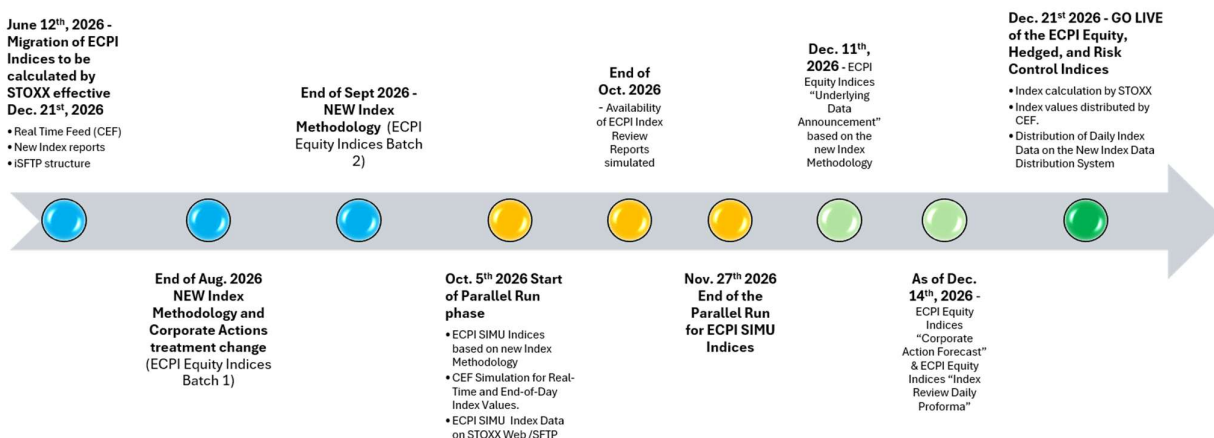

The “**Index Data Distribution System**” is a system where users with commercial agreements with STOXX are entitled to retrieve Index Data for purposes as defined in the commercial agreements. The Index Data Distribution System contains various permission levels, such as entity and user access, commercial packages, Index level access, and incorporates Third-Party data licensing requirements. The “Index Data Distribution System” refers to the STOXX Web and /or iSFTP solution offered by STOXX to retrieve Index Data of ECPI Indices.

The “**Legacy Index Data**” refers to any set of data and files that are produced for ECPI Equity, Hedged, Risk Control, and Decrement indices until December 21st, 2026, and currently distributed on the STOXX “Index Data Distribution System” based on a file format and name convention designed by S&P Dow Jones Indices.

The “**Index Data**” refers to any set of data and files that are produced by STOXX on a regular or irregular basis, applicable to ECPI Equity, Hedged, Risk Control, and Decrement indices, that allows the understanding of the index construction, the index composition and parameters used for the calculation, any upcoming events affecting the index composition or calculation, any other set of data that ensure the index transparency and trackability.

Overview of ECPI Indices Migration to STOXX

The migration of ECPI indices from S&P Dow Jones Indices to STOXX aims to ensure a smooth transition for ECPI Clients from October 2026 to December 2026 and to ensure full readiness step by step. The high-level migration timeline is as follows:

Preparation phase

- **June 12th, 2026:** Announcements regarding the Migration- ECPI to be calculated by STOXX as of December 21st, 2026.
 - Announcement regarding the Real Time Feed (CEF) for the ECPI Equity, Hedged, and Risk Control Indices effective as of December 21st, 2026
 - Announcement related to the new Index reports for the ECPI Equity, Hedged, and Risk Control Indices effective as of December 21st, 2026.
 - Announcement related to the iSFTP structure for the ECPI Equity, Hedged, and Risk Control Indices effective as of December 21st, 2026
- **End of August 2026:** Announcement related to Index Methodology change applicable to the ECPI Equity Indices Batch 1
- **End of September 2026:** Announcement related to Index Methodology and Corporate Actions treatment change applicable to the ECPI Equity Indices Batch 2

Parallel Run phase

- **October 5th, 2026: Start of the Parallel Run** for ECPI SIMU Equity Indices, ECPI SIMU Hedged, and ECPI SIMU Risk Control Indices based on new Index Methodology ("ECPI SIMU Indices")
 - Start of the Simulation phase on the CEF Simulation environment to allow ECPI Clients and Data Vendors to retrieve Real-Time and End-of-Day Index Values. Applicable to a set of ECPI SIMU Indices only.
 - Start of the Distribution of ECPI SIMU Indices Index Data on STOXX Index Data Distribution System on STOXX web Simulation page and on SFTP Simulation folders.
- **End of October 2026:** Availability of ECPI Index Review Reports simulated from last applicable Index Review effective date based on the new Index Methodology applicable to the ECPI Equity Indices Batch 1 and Batch 2
- **November 6th, 2026:** End of the Simulation phase on the CEF Simulation environment.
- **November 27th, 2026:** End of the Parallel Run for ECPI SIMU Equity Indices, ECPI SIMU Hedged, and ECPI SIMU Risk Control Indices based on new Index Methodology ("ECPI SIMU Indices")

Go Live phase

- **As of December 1st, 2026**, the index selection of ECPI Equity Indices Batch 1 and Batch 2 will be based on the Index Methodology change that will be communicated end of August 2026 (ECPI Equity Indices Batch 1) and end of September 2026 (ECPI Equity Indices Batch 2).
- **December 11th, 2026**: ECPI Equity Indices "Underlying Data Announcement" based on the new Index Methodology will be distributed on STOXX Index Data Distribution System to ECPI clients
- **As of December 14th, 2026**: ECPI Equity Indices "Corporate Action Forecast" based on the new Index Methodology will be distributed on STOXX Index Data Distribution System to ECPI clients
- **As of December 14th, 2026**: ECPI Equity Indices "Index Review Daily Proforma" based on the new Index Methodology will be distributed on STOXX Index Data Distribution System to ECPI clients
- **December 21st, 2026**: Effective date of the Index Review applicable to ECPI Equity Indices
- **December 21st, 2026**, start of the day: Termination of Legacy Index Reports for ECPI Equity, Hedged, Risk Control, and Decrement Indices
- **December 21st, 2026**: **Go live of the index calculation by STOXX** of the ECPI Equity, Hedged, and Risk Control Indices
- **December 21st, 2026**: **Go live** of the ECPI Equity, Hedged, and Risk Control Indices values distributed by CEF.
- **December 21st, 2026**, end of day: Distribution of Daily Index Data of ECPI Hedged, Risk Control and Decrement Indices on the STOXX Index Data Distribution System

Overview of the Calculation and Dissemination of ECPI Equity Indices by STOXX

New ECPI Index Calculation & Methodologies

The ECPI Equity Indices will be calculated by STOXX in accordance with the STOXX Calculation Guide, ensuring a standardized, transparent, and consistent approach to index calculation, dissemination, and corporate action treatment. The ECPI Equity Indices will be calculated using the Laspeyres formula, which measures price changes against a fixed base quantity weight. Each index has a unique index divisor, which is adjusted to maintain the continuity of the index values across changes due to corporate actions. For details on the calculation formula used, see section 7.1 Index Formulas described in the [STOXX Calculation Guide](#).

The detailed index methodologies are planned to be published at the end of August 2026 (ECPI Equity Indices – Batch 1) and at the end of September 2026 (ECPI Equity Indices – Batch 2).

ECPI Index values dissemination & ECPI Index Data reports

The ECPI Index values of ECPI Equity, Hedged, and Risk Control Indices will be disseminated via Deutsche Börse Consolidated Exchange Feed (CEF) as of December 21st, 2026

To ensure data continuity, clients are strongly recommended to:

- review their current entitlements,
- assess the impact of these changes by participating in the simulation. A simulation environment will be available for testing (see next section). Clients should email simulation entitlement requests to datafeeds@deutsche-boerse.com.
- ensure CEF products are ordered within MD+S Interactive. Please contact mds.agreements@deutsche-boerse.com if you require entitlement support.

In case you should have any questions regarding CEF® data feeds, please do not hesitate to contact the Functional Operations Team at +49-(0) 69-2 11-1 15 40 or send an e-mail to datafeeds@deutsche-boerse.com.

Please note that, currently the ECPI Equity index values and daily index reports are published on the following business day (T+1). As of December 21st, 2026, the Index Calculation, the End of Day Index Values dissemination, and the associated Index Daily Reports of ECPI Equity Indices will be performed on the same day:

- End-of-day Index values will be disseminated with a close flag via CEF on the same day as the index calculation and, as described in the table below.
- Daily Index reports will be available based on the Index Calculation Region they belong to, as described in the table below.

Index Calculation Region	End of day Index Values Dissemination (Close Index values)	Daily Index Reports *
Asia/Pacific	As from 17:45 CET	as from 19:00 CET
Europe	As from 17:45 CET	as from 19:00 CET
America	As from 22:30 CET	as from 23:00 CET
Global	As from 22:30 CET	as from 23:00 CET

* Please note that Historical index values files are updated around 02:00 am CET t+1

The CEF Product (with the source code STX) associated to ECPI Equity, Hedged, Risk Control, and Decrement indices will be communicated at a later stage.

The dissemination frequency and calendar information for each ECPI Equity Index will be communicated at the end of August 2026 (ECPI Equity Indices – Batch 1) and at the end of September 2026 (ECPI Equity Indices – Batch 2), and the information will be available in the [vendor codes file](#) at close of December 18th, 2026.

Overview of the Parallel Run Phase & Simulation Phase

Parallel Run for ECPI Index Calculation

For the convenience of its clients, STOXX will offer a Parallel Run of ECPI Equity indices calculated by STOXX from October 5th, 2026, to November 27th, 2026.

During the Parallel Run phase, the ECPI Equity, Hedged, and Risk Control Indices will be calculated on STOXX Calculation engines based on the new Index Methodologies. The index maintenance, which includes index calculation, Corporate Actions treatment, Index Selection, will replicate the new ECPI Index Methodologies. Consequently, the index values calculated will not be representative of the current ECPI Index Methodologies and cannot be considered as the official ECPI Equity, Hedged, and Risk Control values, replicating the current ECPI Index Methodologies. The ECPI Equity, Hedged, Risk Control, and Decrement index values currently calculated by the Calculation Agent (S&P Dow Jones Indices) will remain valid and official values until the last index value calculation dated Friday, December 18th, 2026

The new ECPI Index Methodologies will introduce enhancements to the index calculation, review process, and corporate action adjustments. The corresponding notifications will be published at the end of August 2026 (ECPI Equity Indices – Batch 1) and at the end of September 2026 (ECPI Equity Indices – Batch 2) with an effective date set to December 21st, 2026.

Dissemination of ECPI Index Values on CEF Simulation environment

For the convenience of its clients, STOXX will offer a Simulation of ECPI Equity index values dissemination via Deutsche Boerse CEF Simulation environment from October 5th, 2026, to November 6th, 2026.

The Simulation of ECPI Equity index values dissemination via Deutsche Boerse CEF Simulation environment will follow the Simulation schedule to be announced by Deutsche Boerse CEF. STOXX will provide further details and information about the Dissemination of ECPI Index Values on CEF Simulation environment at the end of August 2026.

Index Reports available in Simulation web page and Simulation SFTP folder

During the Parallel Run phase for ECPI Equity Indices, STOXX will provide ECPI Index licensees with the relevant Index Reports to ensure the trackability and replicability of the indices as described hereafter. It will contain the new set of files per index and will allow clients to retrieve ECPI Equity daily files.

- A dedicated Web page available on www.stoxx.com > Home > Resources > Reports > Simulation - Files (<https://www.stoxx.com/simulation-files>) accessible to all clients based on index and third-party data permission.

- A dedicated folder on iSFTP “/STOXX/simulation-files/” accessible to all clients based on the list of packages to which they are entitled.

During the Parallel Run Phase, file names and formats will follow the structure that will be effective as of December 21st, 2026. However, the files will be published in dedicated locations, as mentioned above, and will not contain official data.

Overview of the Go Live Phase

As a reminder, the ECPI Equity, Hedged, Risk Control, and Decrement index values currently calculated by the Calculation Agent (S&P Dow Jones Indices) will remain valid until the last index value calculation dated Friday, December 18th, 2026.

The Index Review effective December 21st, 2026, applicable to the list of indices displayed in the appendix of this Announcement, will be performed based on the **new ECPI Index Methodologies** communicated **End of August 2026** (ECPI Equity Indices Batch 1) and **End of September 2026** (ECPI Equity Indices Batch 2).

On December 11th, 2026: ECPI Equity Indices “**Underlying Data Announcement**” based on the new Index Methodology will be distributed via STOXX Index Data Distribution System to ECPI clients. **As of December 14th, 2026**, ECPI Equity Indices “**Index Review Daily Proforma**” based on the new Index Methodology will be distributed on STOXX Index Data Distribution System to ECPI clients.

As of December 14th, 2026: ECPI Equity Indices “**Corporate Action Forecast**” based on the new Index Methodology will be distributed via the STOXX Index Data Distribution System to ECPI clients. The first ECPI Equity Indices “Corporate Action Forecast” files will be available at the earliest between 04.00 am and 08:00 am CET. The ECPI Equity Indices “Corporate Action Forecast” will include only events affecting the ECPI Equity Indices after the effective date of the Index Review, i.e. from December 21st, 2026. Corporate Actions events effective up to December 18th, 2026, will not be included, as their treatment is subject to the S&P Dow Jones Indices Corporate Actions Methodology.

On December 21, 2026: The Index Review for ECPI Equity Indices will become effective, and STOXX will start the calculation of ECPI Equity, Hedged, and Risk Control Indices in accordance with the new methodologies to be published at the end of August 2026 (ECPI Equity Indices – Batch 1) and at the end of September 2026 (ECPI Equity Indices – Batch 2). The **distribution of daily index data** for ECPI Hedged, Risk Control, and Decrement Indices via the STOXX Index Data Distribution System will take place at the end of the day, while ECPI Hedged, Risk Control, and Decrement index values will also be distributed via CEF.

On the same day, the Calculation Agent (S&P Dow Jones Indices) will cease the calculation and distribution of ECPI Hedged, Risk Control, and Decrement Indices values, and legacy index reports for ECPI Equity, Hedged, Risk Control, and Decrement Indices will be terminated at the start of the day.

The ECPI Legacy folder on iSFTP will remain available. However, no further updates to the legacy index data will be provided after December 21st, 2026.

Overview of Index Data Distribution System

iSFTP Access

The current STOXX iSFTP folder applicable to ECPI Equity Indices will remain applicable until December 21st, 2026. Please note that **/STOXX/<iSFTP Index Symbol>/ECPILegacy contains valid Index data reports applicable to ECPI Equity indices until December 21st, 2026.** This folder will not receive any updated Index Data after December 21st, 2026, representing Legacy Index Data dated December 18th, 2026.

The ECPI Index Data will be distributed per index and will be subject to Third-Party Data Licenses, leading to changes to the folder structure of the iSFTP service. The folder structure will be designed in a similar manner as already implemented for STOXX & DAX Indices. Each folder will contain a particular set of Index Data.

As of December 1st, 2026, the new STOXX iSFTP folder structure will be available in case new Index Data needs to be made available before the Go live date and the effective Index Calculation by STOXX of ECPI Equity Indices on December 21st, 2026. Consequently, for each ECPI Equity indices, the New STOXX iSFTP folder structure will contain the following folders:

- As of December 14th, 2026: /STOXX/<iSFTP Index Symbol>/additional-files & STOXX/<iSFTP Index Symbol>/corporate-files
- As of December 14th, 2026: /STOXX/<iSFTP Index Symbol>/proforma-files
- As of December 21st, 2026: /STOXX/<iSFTP Index Symbol>/composition-files & /STOXX/<iSFTP Index Symbol>/components-files

The table below provides an overview of the changes applicable to the iSFTP Index Data Distribution

Current STOXX iSFTP folder structure	New STOXX iSFTP folder structure
/STOXX/<iSFTP Index Symbol>/ECPILegacy YYYYMMDD_xxxx_NS_ADJ.SDC YYYYMMDD_xxxx_NS_CLS.SDC YYYYMMDD_xxxx_NS_SDE YYYYMMDD_xxxx_NS_SDL YYYYMMDD_xxxx_NS_PRO.SDC YYYYMMDD_xxxx_NS_DPRO.SDC YYYYMMDD_xxxx_PROJECTED_OPEN_FILE.xlsx	/STOXX/<iSFTP Index Symbol>/additional-files CAForecast_xxxx_P###_YYYYMMDD.csv corporateactions_xxxx_YYYYMMDD.csv /STOXX/<iSFTP Index Symbol>/components-files components_P###_xxx_YYYYMMDD.csv /STOXX/<iSFTP Index Symbol>/composition-files closecomposition_P###_xxx_YYYYMMDD.csv opencomposition_P###_xxx_YYYYMMDD.csv close_xxxx.csv * /STOXX/<iSFTP Index Symbol>/corporate-files CCAForecast_P###_xxx_YYYYMMDD.csv

/STOXX/<iSFTP Index Symbol>/historical-files h_xxxx.txt	/STOXX/<iSFTP Index Symbol>/historical-files h_xxxx.txt

* Please note that the file "close_XXXX.csv"* referenced in the above table is pending further Announcement related to New ECPI Hedged Index Reports ECPI Risk Control Index Reports

Please note that folders **/STOXX/<iSFTP Index Symbol>/historical-files** already contain valid Index Data files applicable to ECPI Equity indices.

Please note that **folders /STOXX/<iSFTP Index Symbol>/selection-review-files** contain valid Index Data files applicable to ECPI Equity indices.

Additional information related to the technical migration of the iSFTP Index Data is available in the Technical Announcement "ECPI Equity Indices Migration - Upcoming changes to iSFTP Structure effective December 21st, 2026" dated June 12, 2026, and available on www.stoxx.com in the section Data & Resources / Index Data / Announcements / [System & IT](#).

The information related to the iSFTP solution is available in the STOXX iSFTP Technical Documentation available in the web section Index Data & Resources / Index Data / General / [Technical Documentation](#). The iSFTP Index Symbol can be identified in column AC (field "iSFTP Folder") as published in the web section Index Data & Resources / Index Data / General / [Data Vendor Codes](#).

Web Access

Starting from December 21st, 2026, the ECPI Index Data will be available on the STOXX website. All files produced for each index will be accessible under the Data tab on the respective index webpage. Each index webpage serves as a central access point, providing index-level information, open and close composition data, corporate action files, forecasts, review files, and historical data. Links to the index webpages are available in the "Index Website Link" column of the [vendor codes file](#).

Access to the relevant files and documentation will be provided in accordance with the client's data permissions, including applicable third-party restrictions and subscriptions.

Overview of the new set of ECPI Index Data

The ECPI Index Data will be distributed per index and will be subject to Third-Party Data Licenses, leading to changes in the naming convention and in the file formats of ECPI Equity Indices, Hedged, Risk Control, and Decrement Indices.

Naming convention

The current Index Data set will be discontinued and will be replaced by files per index, with a naming convention including the Index Symbol and a Third-Party licensed data identifier. The naming convention will be applicable to ECPI Equity Indices, Hedged, Risk Control, and Decrement Indices.

- The Index Symbol will be, according to the type of file generated, the Index Symbol (one per index, return type, currency version) representing the index itself, or the Index Main Symbol (usually the EUR Price version). The Index Symbol and the Main Symbol for ECPI Indices are already available in the Vendor Code Sheet (see [vendor_codes_sheet.csv](#) column A & F - fields "Symbol" and "Main Symbol") in the web section [Index Data & Resources / Index Data / General / Data Vendor Codes](#).
- The Third-Party licensed data identifier is displayed in the file name according to the permissioning of Third-Party Data licenses subscribed to by clients and confirmed by the Third-Party Data providers. Whenever a new Third-Party license is added into the system, the file names will change for clients who do not have the new Third-Party license, as confirmed by the Third-Party Data providers.

For further information related to the ECPI Index Data Naming Convention, please refer to the File [Index File Guide](#) available in the web section [Index Data & Resources / Index Data / General / Technical Documentation](#)

File format change – ECPI Equity Indices

For **ECPI Equity indices**, the **new set of ECPI Index Data** will reflect the new ECPI Index Methodology effective on December 2026 and will be composed of a set of various files, as described below and in detail in the technical Announcement “ECPI Equity Index Reports - New file name and format change effective December 21st,2026” published on June 12th, 2026.

File name	Description	Frequency	Symbol
opencomposition_P###_xxxx.csv opencomposition_xxxx.csv	Provides index and component data reflecting upcoming changes effective next index day	Daily	Index Symbol
closecomposition_P###_xxxx.csv closecomposition_xxxx.csv	Contains index and constituent data based on market closing values.	Daily	Index Symbol
components_P###_xxxx.csv	Maps internal keys to standard financial identifiers; used together with composition files.	Daily	Main Index Symbol*
corporateactions_P###_xxxx.csv corporateactions_xxxx.csv	Daily overview of corporate actions and dividends effective next trading day.	Daily	Main Index Symbol*
CAForecast_P###_xxxx.csv CAForecast_xxxx.csv	90-day forecast of expected corporate actions and related index adjustments	Daily	Main Index Symbol*
CCAForecast_P###_xxxx.csv CCAForecast_xxxx.csv	Mapping of internal keys to external identifiers for index constituents	Daily	Main Index Symbol*
qr_P###_xxxx.csv ***	Quarterly review file showing future index composition changes.	Quarterly	Main Index Symbol*
dp_P###_xxxx.csv	Daily proforma file providing target index compositions and weights, incorporating UDA data and Corporate Actions Forecast updates.	Published on a daily basis from T-5 to T-1 prior to the review implementation date.	Main Index Symbol*
h_xxxx.txt	This report shows historical index values	Daily	Index Symbol

*Main Index Symbol can be found in column F of the [data vendor codes](#) file.

P### - The file is generated in multiple versions depending on the third-party data license the client is entitled to.

*** Please note that, effective December 11th,2026, **a content format change as well as extension change** from **XLSX** to **CSV** will be **applicable to the Index Review files – Underlying Data Announcement (UDA)**. See further details in the Announcement “ECPI Equity Index Reports - New file name and format change effective December 21, 2026”.

The new set of ECPI Index Data including files specifications is available in STOXX Files Guide, on www.stoxx.com in the section [Index Data & Resources / Index Data / General / Technical Documentation](#).

File format change – ECPI Decrement Indices

For **ECPI Equity decrement indices**, the new set of ECPI Index Data is **already available** on the Index Data Distribution System and is referenced hereafter for client convenience.

File name	Description	Frequency	Symbol
h_xxxx.txt	Historical index values	Daily	Index Symbol

File format change – ECPI Risk Control Indices

The following section is indicative and will be confirmed in a future Announcement

For **ECPI Risk Control indices**, the **new set of ECPI Index Data** will reflect the new ECPI Index methodology effective in December 2026 and will be composed of a set of various files, as described below and in detail in the technical Announcement “ECPI Risk Control Index files enhancement - STOXX to implement new daily reports effective December 21st, 2026” published on June 12th, 2026.

File name	Description	Frequency	Symbol
close_XXXX.csv	The report includes historical index and parameter values.	Daily	Index Symbol
h_XXXX.txt	Historical index values	Daily	Index Symbol

The new set of ECPI Index Data including files specifications is available in STOXX Files Guide, on www.stoxx.com in the section [Index Data & Resources / Index Data / General / Technical Documentation](#).

File format change – ECPI Hedged Indices

The following section is indicative and will be confirmed in a future Announcement

For **Hedged indices**, the **new set of ECPI Index Data** will reflect the new ECPI Index methodology effective in December 2026 and will be composed of a set of various files, as described below and in detail in the technical Announcement “ECPI Hedged Index files enhancement - STOXX to implement new daily reports effective December 21st, 2026” published on June 12th, 2026.

File name	Description	Frequency	Symbol
close_XXXX.csv	The report includes historical index and parameter values.	Daily	Index Symbol
h_XXXX.txt	Historical index values	Daily	Index Symbol

The new set of ECPI Index Data including files specifications is available in STOXX Files Guide, on www.stoxx.com in the section [Index Data & Resources / Index Data / General / Technical Documentation](#).
