Results of Market Consultation on the switch of the weighting scheme of several DAX equity indices from full market capitalization to free float market capitalization weighted

Dear Sir and Madam,

STOXX Ltd., the operator of Qontigo's index business and a global provider of innovative and tradable index concepts, announces the results of the market consultation on the switch of the weighting scheme of several DAX equity indices from full market capitalization to free float market capitalization weighted.

Results

During the course of the [market consultation](#) conducted from July 31st, 2023 to August 21st, 2023, all respondents were in favor to switch the weighting scheme of the affected indices from full market capitalization to free float market capitalization weighted.

Affected Indices

Scale 30

General All Share

Scale All Share

DAXsector All

DAXsubsector All

Decision

STOXX has decided to apply the following methodology changes:

The weighting scheme for the affected indices will be switched from full market capitalization weighted to free float market capitalization weighted. Details on the free float determination for DAX indices can be found in section 2.3 of the [Guide to the DAX Equity Indices](#).

Free float market capitalization refers to the product of free float and market capitalization (cf. section 2.4 of the [Guide to the DAX Equity Indices](#)).

STOXX intends to implement the changes no later than with the ordinary review on March 18th, 2024.
